

Rolling Hills Covenant Church is currently seeking candidates for a part-time Audio Engineer. This function is responsible for audio mixes during worship services, productions, and special presentations. Support tasks will range from personally setting up and mixing sound and assisting volunteers assigned to operate in that same capacity. Assist with the completion and delivery of audio recordings. Help maintain and repair the various audio/tech systems. Assist with related media pre/post production. Coordinate and execute assistance in the Technical Ministries.

This position requires course work at the college level or a minimum of three years of experience operating sound-systems. The successful candidate will have the following characteristics:

- Significant training and experience in the setup and operation of audio mixing for live audiences.
- Ability to mix various styles of music in a pleasing and musical manner.
- Comfortable operating both digital (Yamaha CL5) and analog sound-boards/sound equipment and a functional knowledge of digital audio networking (Dante).
- Professional skills and understanding in regard to audio post-production and digital editing, internet delivery, as well as layback and sweetening audio for video.
- Knows how to operate current audio production software (i.e. Logic Pro, or equivalent).
- Requires current knowledge of Windows and Macintosh operating systems, word processing, email, and internet functions.
- Requires excellent telephone, verbal, and written communication skills.
- Ability to work with deadlines and collaborate as a team player.

Please send cover letter and resume to the attention of [Brian Johnson](#).
