

Spiritual Age

What is Spiritual Age?

- Spiritual Age is a process that we have developed to determine how advanced a person is in their Discipleship Journey
- The process of evaluation uses the basic human growth cycle from new born to Seniors. We are developing a New Disciples book that will have specific information about the process.
- It is important to note that our spiritual development must be accomplished based on specific benchmarks that are necessary for spiritual maturity.

More about Spiritual Age

- Spiritual Age is intended to measure the spiritual growth and development of Disciples.
- It is a subjective measurement because it is not possible to determine all of the factors that can impact spiritual development.
- The assessment of Spiritual Age must be completed by your spiritual leader. The assumption is that your spiritual leader has direct knowledge of and exposure to you and your Discipleship Journey.

More Information

- If your community of Disciples is interested in getting more information about this process of Spiritual Age. Contact us at ChurchTransformed@BlessedHarvest.org.
- It is imperative for Disciples to know how their spiritual leader evaluates their growth and progress.
- It is also necessary for New Disciples to have a “road map” for their growth and development.
