

Christmas Eve Luminary

Share the gift of light that came into the world when Jesus was born

Supplies:

Craft Sticks

Parchment paper

Glue

Small light (LED tealight or other small light)

Directions:

1. Glue together the ends of 4 craft sticks to form a square.
2. Glue a parchment paper square (colored or white tissue paper) to the back of the craft stick square.
3. Repeat steps 1 and 2 until you have 3 or 4 squares with tissue paper on them. Your luminary can have 3 or 4 sides (I found it easier to glue 3 together).
4. Glue the 3 or 4 sides together and hold them together with a rubber band for at least an hour
5. Position an LED tealight in the center and watch the luminary glow!
