

COVID-19 OVERNIGHT GUEST GROUPS

As part of our response to COVID-19, we ask all of our guests to help us stop the spread by implementing the following:

- Prior to arrival, please follow strict social distancing guidelines by wearing a face mask/face covering when around members outside your immediate family and stay home as much as possible in the 14 days prior to arrival.
- Please do daily temperature checks the seven (7) days prior to arrival and record on the log on back of health screening form.
- All guests will need to complete the health screening form. Anyone with symptoms in the 72 hours prior to arriving at Camp Siloam should stay home and not come to camp.
- Individuals with pre-existing conditions such as high blood pressure, diabetes, autoimmune disease, cardiovascular disease, respiratory disease (including asthma) and/or immunosuppressed are at an increased risk of severe illness or death if COVID-19 is contracted. These individuals may choose to not attend camp.
- Please wear a mask/face covering when participating in indoor activities when social distancing may not be possible.
- Please obtain daily temperature for guests in your bunkhouse. A log sheet and thermometer will be provided.
- Extra hand washing and hand sanitizing will be available and recommended often.
- To aid in stopping the spread, we asked that anyone with a temperature of greater than 100.4 F is sent home. Please let the Camp Siloam host know and place a mask on the ill person.
- Bunks will be spaced to comply with CDC guidelines to allow six (6) feet between the head of each guest. We ask that you sleep head to toe. Maximum of 12 guests for bunkroom.
- We recommend your entire group stay on campus for the duration of your event. If one must leave, we ask that they wear a mask while off-campus and follow all social distancing guidelines.
