

How to make a Treasure Bottle

What you'll need:

- A plastic bottle with a lid
- Rice (or sand or lentils...)
- Little objects (e.g. a marble, a coin, a pom pom, a ribbon)
- Sellotape
- Scissors
- A funnel (optional)

1. Make a list of all your objects that will go inside your bottle (you could draw this, write this or even take a picture of your items like in the picture above!)
2. Put all the little items inside your bottle
3. Pour your rice/sand/lentils inside the bottle so that it covers all your hidden objects (make sure to leave a little room at the top)
4. Put the lid on tightly and secure this with Sellotape
5. Add your picture/list to your bottle so you know what you're looking for
6. Shake your bottle to see if you can find all your hidden items!
