

## **Little Acorns Child Development Center Summer Reading Camp**

Are you looking for a way to introduce your preschool child to new experiences this summer?

What better way to explore our world, than through the magic of reading, at Little Acorns Child Development Center Summer Reading Camp! On Tuesdays and Thursdays in the month of July, we have a great opportunity to take your preschool-aged child on a reading adventure. Each week, our entire school will focus on a well-known children's author. Every age group, from infants through five-year-olds, will have specific age-appropriate books to read. From each of these books will come reinforcement activities that encompass learning at your child's developmental level. We will also give you a list of the books your child will be enjoying at school, so that you might purchase them for your own home library. At Little Acorns CDC, we believe it is our job to work together with parents to provide as many tools for your child's "educational toolbox" that we can. So, will you partner with our staff this July, as we engage your child in our world, through the beauty of children's literature? We are looking forward to our summer adventure at Little Acorns!
