

The Andersons To Perú

Dear Friends and Family,

July 2020

These last few months have felt like a roller coaster ride for us. In March, Kathy started experiencing some abdominal pain again. After a series of doctors' visits and tests, we were told that her cancer has returned with a vengeance. She has tumors on her liver, kidney, both lungs, stomach and in her lower abdomen. We had the amazing privilege of getting her in for more tests at MD Anderson at a time when they were not taking new patients because of the backlog they had due to COVID. God worked out the details and within just a few days Kathy had appointments scheduled. The results came back the same, but we were thankful to have a second opinion from such a respected institution.

The doctors have given her 6-8 months to live without treatment and 1- 2 years with treatment. We have opted for quality of life instead of spending the last months with her having treatments every 2 weeks. We would rather spend this time making memories with our family and friends.

We know that God is Sovereign and Good. He has already worked out so many details. We have seen His hand in all of this. We have peace knowing that Kathy's future is secure because she trusted Christ as her Savior at a young age. Our desire is that God would use this for His glory and that others would come to Christ because of it. Already we have had several opportunities to share the truths from God's Word because of this.

Please pray for our family as we go through this time. We are all close together in Pensacola FL. Kathy's parents are currently in Pensacola also. My plans are to return to Perú as God leads in the future.
