

SLIME INSTRUCTIONS

SUPPLIES NEEDED:

- 1/2 cup of Elmer's® Washable PVA Clear Glue or White Glue
- 1/4-1/2 cup of liquid starch
- 1/2 cup of water
- Green food coloring
- Plastic freezer size bag

INSTRUCTIONS:

1. In a bowl, mix 1/2 cup water and 1/2 cup of glue.
2. Once water and glue are mixed thoroughly, add the green food coloring. Begin with only a few drops, continuing to add until you achieve the perfect "slime green" color!
3. Pour in 1/4 cup of liquid starch. You should see the slime begin to form.
4. Continue to stir until the liquid is gone and your slime has formed. Don't be afraid to add a bit more starch if your liquid is not completely gone.
5. Your slime may appear stringy at first, but continue to work with it until the consistency changes. You may need to set the slime aside for a few minutes and allow it to continue to form on its own until you see the consistency change.
6. Once all steps are completed, place your slime in a freezer bag.
7. If preparing slime a few days ahead of when it will be used, make sure to knead it every now and then to keep it fresh.

What to Do:

Print one copy if preparing your own slime.
