

# MISSIONARY NEWSLETTER

Jun 21th 2022

**Beloved partners in prayer, friends and maintainers,  
Grace and Peace in the name of Jesus!**

As I returned from the trip to Amazon I attended several forums and congresses and had two more trips to other places in Amazon. Now I am home I can write this newsletter because I really want to share about our research trip with you.

On April, after 2 years of planning and overcoming the pandemic challenges, we could finally take the two boats (tight to each other) to Juruá River where from now on they will serve the missionaries over there. On the way through unknown places we also did a missionary research that brought to us important information that will result in great things for the missionary work in Amazon.

We left Lábrea city on Purus river and went down the river to Solimões river. From there we navigated until Juruá river and arrived at Cruzeiro do Sul city in Acre State. We started this trip on February 14th to conclude de boats and prepare them for the most challenge trip we have ever done in our missionary career. It was more than 4 thousand kilometers (2.500 miles) with challenges including passing trough the Red Zone at Solimões River, an area with pirates and robbers, but God was with us and by His grace nothing happened to us.

**What happened in this trip?** We navigated this route, village by village, for the research to Frontiers Project II and we map the region taking pictures of the houses and villages with all the information we could get. We also added the location of the places with latitude and longitude. It will be all in the map at the website Frontiers Project II, with this information many missionary organizations will be able to plan strategic expeditions in the future.

**Who was in the trip?** I was in charge for the trip and with me was my wife Mariles and 3 more teams that alternated during the route.

TEAM 1: Pastor André and his wife Rutiele, Missionary Tiago, Missionary Oscar and wife Mariles

TEAM 2 - Raimundo(Santo), his daughter Ester, his father Antônio (volunteers missionaries) Oscar and Mariles.

TEAM 3 - Missionary Marcos, BortheraBila and missionaries Oscar and Mariles.

**What we did over there?** On the way we distribute Bibles, books and 1000 of Heavenly Cards (It's a chip for the cell phone containing the audio of the Bible, 500 hymns, radio programs of HCJB Brazil for men, women and children). Each time we had the opportunity we did a service

**The results?** Each village and each house somehow received the word of God, through speeches, Bibles or the heavenly card. Also, the research will help to orientate many projects opening the path to other missionary actions. We also started two news bases for EMAF (Evangelic Mission of Assistance to Fisherman), with groups of volunteers missionaries that are recruited to keep evangelizing Juruá river and the rivers around.

**Future Plans:** Our goal now is to seek resources so me and my wife (Oscar and Mariles) can go regularly to Juruá river to structure the new bases that we planted there. We need to find and train two couples in each base and turn the bases into strategic missionary bases from where the missionaries can reach many rivers and streams in the area with the word of God, with bible studies, with discipleship and the formation of native leadership in the riversides communities. We are thankful for your prayers and for everyone that are in the missionary boat with us.

Let's keep together for the kingdom

**Come with us!**

Pastor Oscar and family
