Description: The mission of Habitat for Humanity (HFH) is to help hard-working individuals and families build strength, stability, and self-reliance through shelter and the belief that everyone should have access to the benefits of homeownership. HFH partners with families to build simple, decent and affordable housing. The low cost of the homes is made possible by the volunteer support of people in the community, following the lead of construction professionals, and working in tandem with the new owner family. Thanks to the generosity of volunteers, HFH is able to sell their homes, at no profit, to qualified families with a 0% interest mortgage loan.
