

What is the true calendar of Yeshua?

Written by Joshua Antilla

We do not know EXACTLY what the original calendar was, but we know that Jesus kept the same calendar as the rest of the Jews since He arrived in Jerusalem when the Jews did. We don't have a lot of info about that calendar, but we do know that the Hillel II calendar (the modern Jewish calendar) was based on it and the biggest difference is that the calendar during the time of Yeshua was an empirical calendar (based on observance), whereas Hillel II is a calculated calendar (based on mathematical and astronomical calculations). Corner Fringe follows the Hillel II calendar as its religious calendar. This calendar is from the 4th century, and it is the only calendar (that I know of) which was made by those who used the same calendar as Jesus. So, it is the oldest and most reliable resource for understanding how the calendar of Jesus was done. This calendar also seems to calculate the months based on when the new moon was sighted in Jerusalem. We differ on only two things with the Jews in the interpretation of the Hillel II calendar, in that we begin counting the Omer on the Sunday within the Passover and as a result, Pentecost is always on a Sunday.
