

WELL CHILD POLICY

KIDS MINISTRY

For the protection of kids and families in our ministry, please adhere to these guidelines when determining if you should check-in your kids.

A WELL CHILD HAS:

- No fever 100° or higher currently or within the past 72 hours
- No vomiting or diarrhea currently or within the past 72 hours
- No runny nose
- No cough
- No sore throat
- No unexplained rashes
- No skin infections
- No eye infections
- No childhood diseases such as chicken pox, mumps, measles, etc.

IF YOUR CHILD HAS SYMPTOMS:

- For the protection of kids and volunteers in our ministry, we cannot check a sick child into Kids Ministry space.
- If your child currently has any of the above symptoms or has experienced a fever, vomiting or diarrhea in the past 72 hours ... Please keep them at home.
- If others in your household have experienced a fever within the past 72 hours....Please choose to stay home.
- If others in your household have experienced any of the other above symptoms....Please use an abundance of caution and your best judgement in attending services.

IF YOUR CHILD DEVELOPS SYMPTOMS WHILE IN OUR CARE:

- We will ask you to pick up your child immediately. You will be notified via text message. If you do not respond to text, your parent pick-up code will be flashed on the main screen.
- For the safety of kids in our care, we will not administer medicine of any kind during Sunday Morning Services. In case of emergency, we do have some meds available that can be administered by parents, guardians, or medical staff.

Your cooperation is greatly appreciated! Thank you for helping to protect the kids and families in our church!
