CEDS Resolution

SECTION 1

OVERVIEW

This chapter provides an outline of...

- Area Organizations and Governance
- CEDS Committee

Overview

A *Comprehensive Economic Development Strategy* (CEDS) is the result of a local planning process designed to guide the economic growth of an area. A CEDS process will help create jobs, foster more stable and diversified economies, and improve living conditions. It provides a mechanism for coordinating the efforts of individuals, organizations, local governments, and private industries concerned with economic development. Furthermore, a CEDS is required to qualify for Economic Development Administration (EDA) assistance under its public works, economic adjustment, and other planning programs, and a CEDS is a prerequisite for designation by EDA as an Economic Development District (EDD).

The Comprehensive Economic Development Strategy (CEDS) process began in 1992 when Kentucky's Area Development Districts (ADDs) were challenged to create a comprehensive, community-based strategic planning process that would encompass the entire Commonwealth. Throughout the following year, the Pennyriple Area Development District (PADD) Board of Directors and other key stakeholders guided the development of the first study. The study was then updated in the following years. The update process built upon the guidelines set forth in the previous studies.

The Pennyriple Area Development District (PADD) is organized as a non-profit corporation and is one (1) of fifteen (15) such Development Districts in Kentucky. Geographically, the Pennyriple ADD includes Caldwell, Christian, Crittenden, Hopkins, Livingston, Lyon, Muhlenberg, Todd, and Trigg counties. The PADD Board of Directors is composed of a minimum of 51 percent elected officials with the remainder of the Board representing agriculture, commerce, industry, civic organizations, education, labor and minorities.

The 2020 CEDS has been rewritten and will be referred to as the *Pennyriple Area Development District Comprehensive Economic Development Strategy 2020*. As the Pennyriple Area Development District moves through the 21st Century, its mission will be a continuation of support to local governments for economic and community development. The ADD is committed to working with community leaders and their respective elected officials to provide a level of services and facilities beneficial to all residents of the Pennyriple.

Local, state and federal funds are becoming increasingly difficult to obtain and citizens are demanding greater accountability for the funds being allocated at all levels of government. As a result, strategic planning becomes even more critical. Through strategic planning, development within the region will be more cost effective and result in the most efficient utilization of the available funding.

This 2020 CEDS reflects the specific challenges and opportunities of this area. The six (6) main areas of this report are as follows:

- Background
- Overview of Economic Conditions
- SWOT Analysis
- Strategic Direction and Action Plan
- Economic Resilience.
- Evaluation Framework

The analysis addresses the local and state economy, the opportunities and threats posed by external trends and market forces, and the availability of partners and resources for economic development. The community's vision and goals, together with the appraisal of the region's competitive advantage, set the strategic direction for the action plan. The action plan establishes the program priorities for implementation, and the implementation section was developed to measure performance and track progress.

Area Organizations and Governance

The Pennyrile region encompasses over 3,790 square miles or 2,426,880 acres of low-rounded hills interspersed by broad alluvial valleys and is part of the Western Coal Field Region. Each area has historically provided the economic base for the Pennyrile with rich mineral resources and prime agricultural farmland.

Appendix A includes a map of the Pennyrile Area, as well as the Congressional and State Senate and House of Representative Districts in the Pennyrile region.

- Environment
- Inland Waterway System

SUMMARY OF ECONOMIC CONDITIONS

Population Size

The population growth patterns were analyzed from 1950 to 2010 as shown in *Table 1, Population of the Counties in the Pennyryle ADD*. The population of the Pennyryle region has increased over the past sixty (60) years. The counties with bigger cities have experienced larger population growth. There are four (4) counties that have experienced a slight population decrease within the last ten (10) years. They are Caldwell, Crittenden, Livingston and Muhlenberg counties. The decrease or slow growth in the Pennyryle rural populations tends to follow the national trend of people moving to more urban areas for employment. A sizable portion of Trigg and Lyon County's population increases are due to people who are retiring or are drawn to the quality of life of the community because of Lake Barkley and the Land Between the Lakes (LBL) Recreation Area.

Table 1
Population of the Counties in the Pennyryle ADD 1950 to 2010

Area	1950	1960	1970	1980	1990	2000	2010

Source: U.S. Census Bureau, *Census of Population, 1950-2010*

Trigg County is the fastest growing county within the Pennyriple Area Development District with a growth rate of 13.8 percent over the last ten (10) years. Christian County is projected to be the third fastest growing county, which is currently the region’s largest manufacturing center.

An understanding of the present population characteristics helps the community to determine the adequacy of existing land use patterns, economic arrangements, and community facilities in terms of meeting existing needs. Changes can also be made in projected population trends by significant changes in economic development strategies and proactive land use planning processes.

Table 2
Population Changes of Counties in Pennyriple ADD 2000 to 2010

Area	2000	2010	Percentage Change
Pennyriple ADD	215,519	219,305	1.8%
Caldwell	13,060	12,984	(0.6)%
Christian	72,265	73,955	2.3%
Crittenden	9,384	9,315	(0.7)%
Hopkins	46,519	46,920	0.9%

Population Composition and Age Distribution

The age composition of the Pennyriple ADD population underwent significant changes over the last decade as indicated in *Table 3, Pennyriple ADD Age Composition Changes, 2000-2010*. Following the trend throughout the United States, Pennyriple ADD residents are having fewer children, and therefore, the percentage of the population under 19 had a small increase over the last ten (10) years. On the other hand, the percentage of persons 65 years of age and over is increasing as the “baby boomer” generation reaches this age bracket. The percentage of persons over 65 years old also reflects the trend of people living longer and relocating to small rural towns upon retirement.

**Table 3
Pennyriple ADD Age Composition Changes 2000 – 2010**

Age Group	2000 Population	2010 Population	% Changes 2000-2010
All Ages	215,519	227,474	5.5%
0-19	59,687	61,283	2.7%
20-64	126,537	135,291	6.9%
65+	29,295	30,900	5.5%

Economic Analysis

The following tables provide a quantitative look at the Pennyriple ADD economy in four ways: as a whole, in comparison with the state, in comparison with the other counties in the region, and broken into component parts. The tables display data regarding the labor force and employment trends of county residents, including data regarding poverty and median income trends.

As indicated in *Table 5, Pennyriple ADD County Labor Force Characteristics*, the average unemployment rate for the Pennyriple ADD was 8.20 percent in August, 2020. The county that had the highest unemployment rate was Muhlenberg County with an unemployment rate of 10.5 percent. Christian County’s had the second highest unemployment rate (8.50%), which was 0.9 percent higher than the State’s average during the same time period.

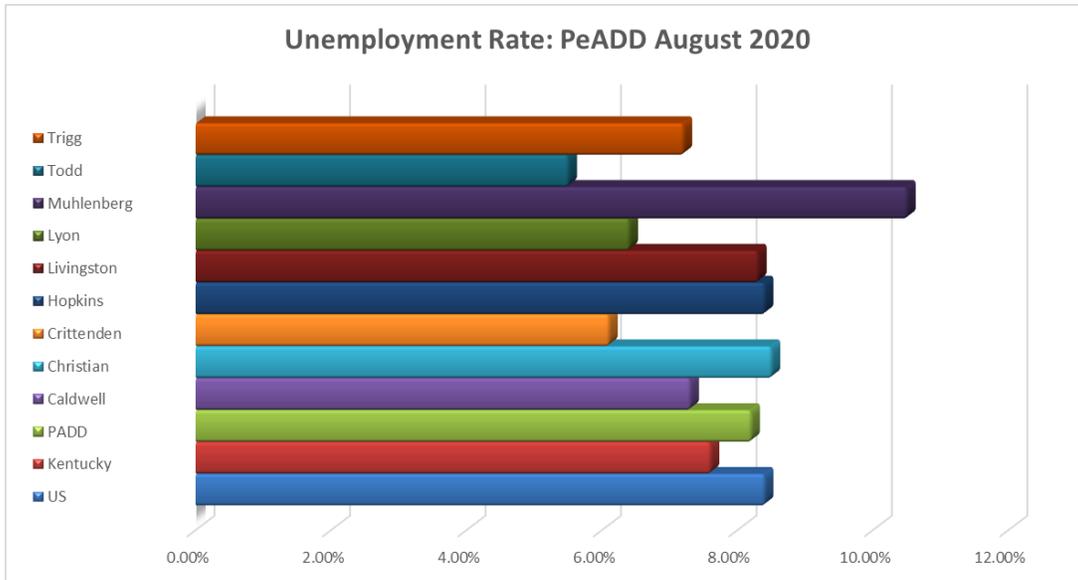

There were five (5) counties in the Pennyriple ADD that had lower unemployment rates than the State for the same time period. These were Caldwell County with a 7.3 percent unemployment rate, Crittenden County with 6.1 percent, Lyon County with 6.4 percent, Todd County with 5.5 percent and Trigg County with a 7.2 percent unemployment rate. The unemployment rates in most of the Pennyriple ADD counties have historically been higher than the State and National averages.

**Table 5
Pennyriple ADD Labor Force Characteristics: August 2020**

Area	Civilian Labor Force	Employment	Unemployment	Unemployment Rate
Kentucky	2,010,838	1,858,326	152,512	7.60%
PADD	77,861	71,508	6,353	8.20%
Caldwell	5,249	4,865	348	7.30%
Christian	24,940	22,816	2,124	8.50%
Crittenden	3,593	3,374	219	6.10%
Hopkins	16,552	15,154	1,398	8.40%
Livingston	3,353	3,075	278	8.30%
Lyon	2,948	2,760	188	6.40%
Muhlenberg	9,935	8,890	1,038	10.50%
Todd	5,289	4,995	292	5.50%
Trigg	6,004	5,573	431	7.20%

Source: KY Labor Market Information

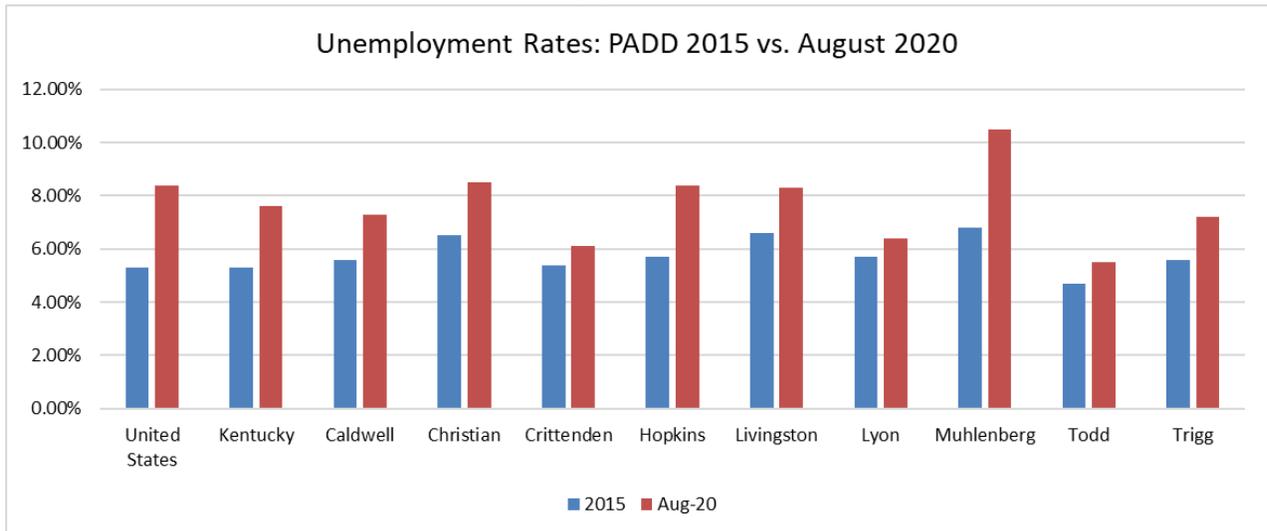

The Pennyriple ADD, like all of the United States, is facing the COVID-19 Pandemic, which has caused a National economic recession. Most of the job loss in our region is due to shutdowns that are a direct result of the pandemic.

Source: KY Labor Market Information

As shown in Table 6, Unemployment Rates: PADD Counties 2015 through August 2020, the unemployment rates show that all nine (9) counties in Pennyriple ADD had unemployment rates that have increased due to the 2020 COVID recession. Muhlenberg County had the highest unemployment rate in the Pennyriple ADD which has also been impacted by Coal Power Plant closures and the general reduction in coal mining employment. The remaining counties range from a fraction of a percentage point above the national unemployment rate to unemployment rates lower than the national average.

Table 6

Source: <http://thinkkentucky.com>, KY Labor Market Information, and Bureau of Labor Statistics

The unemployment rate of the counties in the Pennyriple region was compared to the unemployment rates over the last five (5) years in *Table 7, Civilian Labor Force and Unemployment Estimates for Pennyriple ADD Counties, Annual Averages from 2016 to August 2020*. Eight (8) of the nine (9) counties in the Pennyriple ADD region had their unemployment rates drop to rates that are lower than their 2015 unemployment rates. Muhlenberg County's unemployment rate remained the same at 6.8 percent over the 2015 to 2019 time period.

Of the nine (9) counties in the Pennyriple region, three (3) of these counties had significant losses in their employment and civilian Labor Force from their 2016 levels. These were Christian, Hopkins and Muhlenberg counties. For example, Hopkins County's 2017 employment was 20,341 persons, which then decreased to 16,552 persons by August 2020. This is a reduction of 3,789 people in the Labor Force in the county which is a 19 percent decrease from 2017 to August of 2019.

Christian County lost 973 jobs in the county from 2016 to Aug. 2020, and 570 people from their Labor Force from 2016 to Aug. 2020. Over this same time period, the unemployment rate increased from 6.7 percent to 8.5 percent.

	2019	6,024	5,741	283	4.70%
	Aug-20	6,004	5,573	431	7.20%

An analysis of the income and poverty level within the Pennyriple ADD was conducted to compare the regional income to the State averages as indicated in *Table 8, Persons Living Below Poverty in the Pennyriple ADD: 2015 – 2018* and *Table 9, Median Income in the Pennyriple ADD: 2015 – 2018*. In the State of Kentucky, the poverty level increase 8.05 percent over the four (4) years between 2015 and 2018, while the median income increase of 10.33 percent over the same time period. All nine (9) of the Pennyriple ADD counties had an increase in poverty levels over the 2015 to 2018 period with Caldwell and Livingston counties having only a very slight increase. Six (6) Pennyriple counties saw an increase in their Medium Income over the 2015 to 2018 time period. The largest Median Income increase was in Todd County, which had a 24.57 percent increase in Median Income over the same time period,

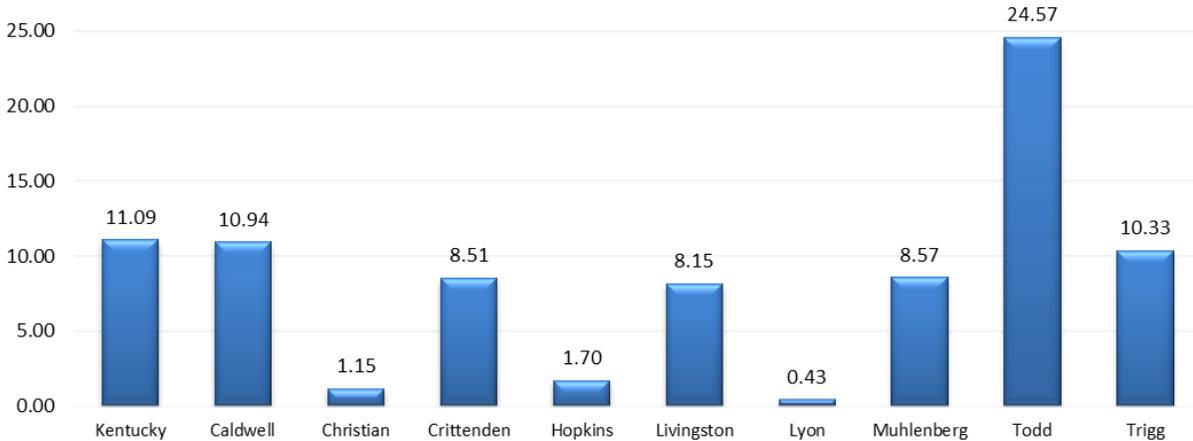

**Table 8
Persons Living Below Poverty in the Pennyriple ADD: 2015 – 2018 (Estimated)**

Area	2015	2018	Percent Change 2015 -2018

Table 10

Per Capita Personal Income: PeADD 2015-2018

Source: Bureau of Economic Analysis, US Department of Commerce

The data shows that Per Capita Income has increased in all of the PADD counties from 2015 to 2018 as shown in *Table 10, Per Capita Income in the Pennyriple ADD 2015-2018*, with the exception of Christian County. However, none of the Pennyriple ADD counties had their Per Capita Incomes over the State average during this same time period.

- 1- Non-farm personal income is total personal income less farm income.
- 2 - Farm income is farm earnings less farm employer contributions for social insurance.
- 4 - Per capita personal income is total personal income divided by total midyear population.
- 5 - Contributions for government social insurance are included in earnings by type and industry, but they are excluded from personal income.
- 6 - The adjustment for residence is the net inflow of the earnings of inter-area commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7 - Rental income of persons includes the capital consumption adjustment.
- 8 - Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Education

Nearly 13 percent of Kentucky residents do not possess a high school diploma or Graduated Education Diploma (GED); that number is even higher for seven (7) of the nine (9) counties in the Pennyriple Area Development District. Todd County has the highest percentage of residents without a high school diploma or GED at 26.3 percent, while Christian County has the lowest percentage at 9.7 percent.

In the State of Kentucky, 23.2 percent of the population has a Bachelors degree or higher, compared to 30.9 percent of US population. Trigg County has the highest percentage of residents holding a Bachelors degree or higher with 16.9 percent and Livingston County had the lowest with 8.9 percent.

The percentage of Kentucky students ready for college by graduation was 65.4 percent. In the PADD region, Lyon County has the highest percentage of students ready for college by graduation with 83.3 percent, while Todd County had the lowest percentage (47.1 percent).

Economic Cluster Analysis

Economic clusters are groups of businesses and institutions with some similarity in industry, operation, or technology. These businesses and institutions are generally located within a specific geographic area. Often these businesses may be part of the same supply chain or may even be direct competitors. The clustering of these organizations can be mutually beneficial in a number of ways, such as the development of a labor force with a common skill set, the creation of research institutions developed to serve these businesses or the location of support services specific to that cluster. In addition, a more competitive environment may be created. Increased competition may lead to firms collaborating in ways they may not have considered before, or may pressure firms to increase their productivity, efficiency or creativity.

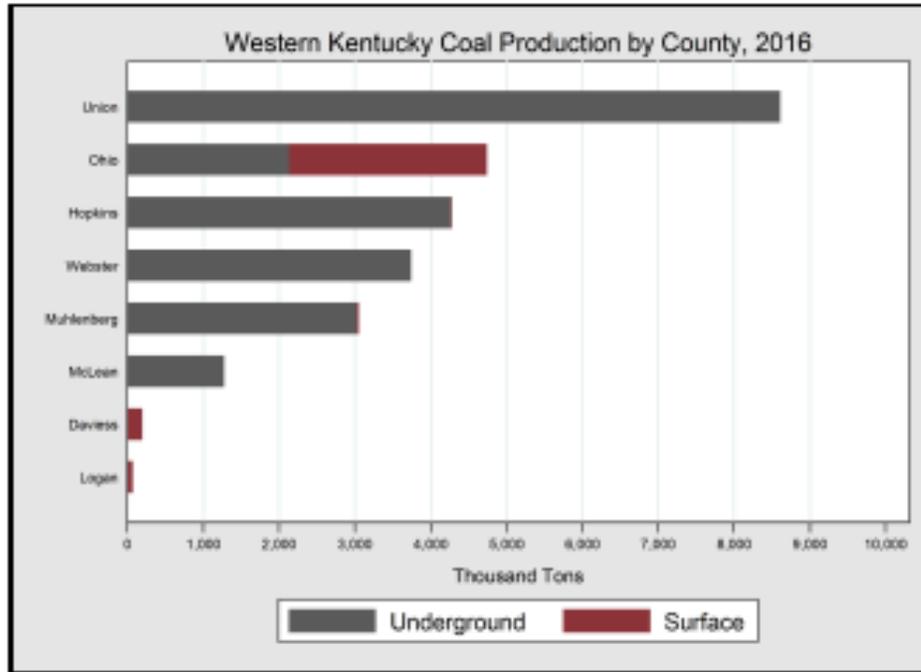

The following are traditional and emerging clusters of note in the Pennyriple ADD region. These clusters are not the only economic groupings in the region, but were selected due to their prominence, need of support, or opportunity for facilitation. The clusters identified were:

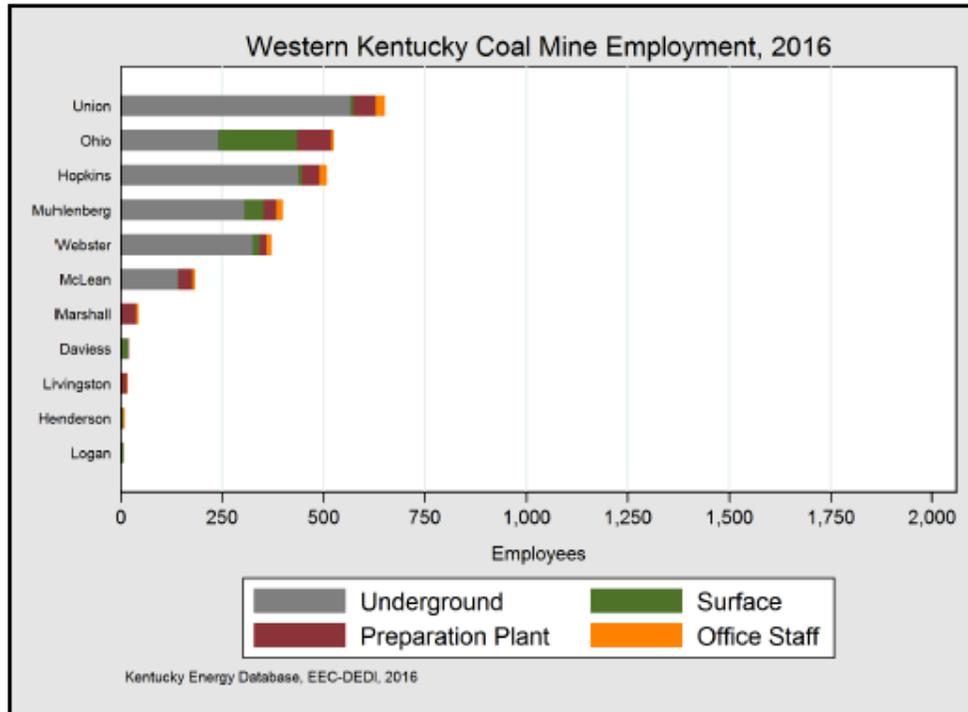

Automotive Suppliers

There is a large cluster of automotive suppliers in the Pennyriple region. These manufacturing plants provide Just-In-Time (JIT) inventory for the automotive industry in the State of Kentucky and surrounding states. Although there are no automotive production plants in the Pennyriple region, the area has 21 manufacturing and other companies that support the auto industry.

Kentucky is the fourth largest producer of cars and light vehicles and the fifth largest producer of trucks in the country. The State accounts for 10.2 percent of all cars and trucks produced in the country. Ford was the first auto production plant to come to Kentucky in 1913 to the City of Louisville. Today, the Louisville’s Ford Truck Plant has approximately 6,600 workers. On June 1, 1981, General Motors (GM) moved production of the Corvette from St. Louis to Bowling Green, Kentucky, which still remains the exclusive home of the Corvette. There are 1,200 employees at the Bowling Green Plant, which has since started production of a Cadillac XRL line in 2002. Toyota started production in the Georgetown, Kentucky plant in 1988, which is Toyota’s largest North American production plant with approximately 7,400 employees. There are also nearby automotive production plants in Indiana and Tennessee that are supplied by the Pennyriple area automotive suppliers.

There are 21 firms in the Pennyriple region that are connected in some way to the automotive supply industry or are related to this industry in some manner. These 21 companies employ approximately 5,576 employees in the Pennyriple region and is the largest economic cluster in the region.

Agriculture

The Pennyrile Region has enjoyed a rich heritage in agriculture and this tradition continues today. Corn, soybeans, wheat, tobacco, cattle and poultry are the main commodities produced in the region. Value added agricultural products are a continuation of this evolution. US Tobacco has long had a processing plant in the region that produces smokeless tobacco products. Commonwealth Agri-Energy, LLC developed, in partnership with a major grain elevator coop in Christian County, an Ethanol Plant that produces Ethanol as well as animal feed and other by-products from corn grown within the region. There are numerous other agricultural support businesses and services in the region.

The market value of agricultural products sold in the Pennyrile region has seen an increase over the last five (5) years. The total market value of all agricultural commodities in the Pennyrile region was \$768,977,000 in 2017 according to the Kentucky Department of Agricultural data. This was an increase of 11.7 percent from the \$688,066,000 total market value of all agricultural commodities sold in the Pennyrile in 2012.

As indicated in *Table 22, Pennyrile ADD - Market Value of Agricultural Products Sold (2012–2017)*, in the PADD counties, Christian County sold the most agricultural products in 2017 with \$205,275,000 worth of products. Todd County sold the second largest amount of agricultural products with \$175,617,000 in sales in 2017.

As shown in *Table 21, Pennyrile ADD – Value of Sales by Commodity Group 2017*, grain crops were the largest selling agricultural commodity in all nine (9) counties in the region. Christian County had the largest grain sales with \$129,007,000 in 2017. Todd County had the second highest amount of grain sale with \$64,334,000 in 2017.

There is no industry more prone to natural disasters than agriculture. In Kentucky, agriculture is the number one economic generator statewide accounting for more than \$5 Billion annually and almost 10% of the state’s economy. The ever increasing frequency of natural disasters has forced leaders to look at ways to bolster mitigation efforts and enhance the resiliency of this sector of the economy.

Despite the setbacks of recent disasters, there is a renewed realization that Agriculture is a crucial and ever-growing sector of the state’s economy. In addition to the CEDS processes, most recent economic development studies have pointed to the impact of current and projected agriculture related activities. In addition, value-added agriculture,

bio-energy projects, and local food initiatives are recommended as economic development strategies for implementation statewide. The Area Development Districts and the Kentucky Department of Agriculture share the vision that economic development and agriculture go hand in hand.

The Kentucky Area Development Districts are partnering with the Kentucky Department of Agriculture, the Governor's Office of Ag Policy and the Economic Development Administration to undertake this unique statewide initiative that has resulted in the following activities aimed at reducing the impact of future disasters while providing a framework to further enhance the agricultural economy in Kentucky.

- a. Development of a dynamic GIS Agriculture Database that includes disaster prone facilities, potential sites for Agricultural Development, aggregation/distribution facilities, and other assets to include the updating of the Kentucky Economic Development Information System (EDIS), which includes agricultural related industrial sites, potential sites, and other information.
- b. Development of an all- inclusive database and GIS system of all organizations, individuals, infrastructure, and other assets involved in local food.
- c. Collection of data and development of strategies to minimize future devastation by natural disasters by identifying crucial food production and supply facilities
- d. Creation of a statewide strategy to provide a framework to plan, form relationships, strengthen alliances and better connect rural suppliers and urban consumers
- e. Support and development of cohesive statewide strategies to better implement the federal and state initiatives such as “Know your farmer, know your food” and “Farm to Table”
- f. Support and movement of the Agricultural sector into mainstream Economic Development Strategies.

Table 21
Pennyrile ADD - Value of Sales by Commodity Group (\$1,000) (2017)

Commodity	Caldwell	Christian	Crittenden	Hopkins	Livingston	Lyon	Muhlenberg	Todd	Trigg

Forestry and Primary Wood Industries

Kentucky has one of the most diverse hardwood species mix in the nation and ranks third nationally in hardwood production. The Kentucky Division of Forestry estimates that there are more than 3,500 forest industries in the state, and these industries employ more than 30,000 Kentuckians.

There are approximately 47 major companies in the Wood Industry in the Pennyriple Region employing over 500 people.

Tourism

The Pennyrile region is fortunate to have several tourism attractions from local festivals to the Land Between the Lakes (L.B.L.) National Recreation Area. The Kentucky Tourism Cabinet estimates that the 2018 total travel expenditures was \$409,640,000 in the Pennyrile counties.

**Table 24
Travel Expenditures in Kentucky (in Millions)
2017 and 2018**

Area	2017 Direct Expenditures	2017 Total Expenditures	2018 Direct Expenditures	2018 Total Expenditures
Kentucky	\$7,294.06	\$10,922.56	\$7,563.20	\$11,248.94
Caldwell	\$8.87	\$14.37	\$8.83	\$14.33

Trigg County Country Ham Festival

The Land Between the Lakes (LBL) is a 170,000-acre National Recreation Area located on a peninsula between Kentucky Lake and Lake Barkley. LBL is a vast area full of adventure for those who are looking to explore several hundreds of miles of country roads, shorelines and trails. L.B.L. provides boating, fishing, hiking, camping, horseback riding, and ATV trails, as well as many other attractions. There are 1.4 million visitors that come to L.B.L. annually.

The scope of the size of L.B.L. is better understood with the facts listed below:

171,280 Acre peninsula that is 1-9 mile wide and 40 miles long

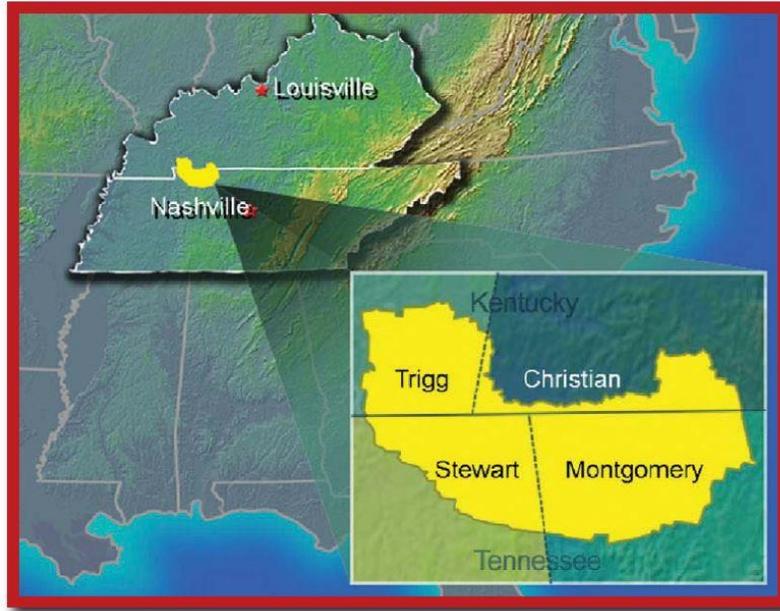

- 300 Miles natural shoreline*
- 190 Acres wildlife refuges*
- 200 Wildlife watering holes*
- 261 Miles hiking trails*
- 106 Miles horse trails*
- 70 Miles mountain bike trails*
- 100 Miles off-road vehicle trails*
- 444 Miles scenic roads*
- 15 Designated camping areas with lake access*
- 1,427 Camp sites*
- 26 Boat ramps*
- 5 Environmental Education Facilities*
- 4 Gateway State Park Resorts*
- 2 States: Kentucky & Tennessee*

Ft Campbell Army Base

Ft. Campbell is home to the 101st Airborne Division, 5th Special Forces Group, 160th Special Operations Aviation Regiment (SOAR) and several other units. The Fort is located in southwestern Kentucky and straddles the Kentucky/Tennessee line. A portion of the base is in Trigg and Christian Counties in the Pennyrile region, and two (2) counties in Tennessee. The Fort has 64,000 acres of maneuver lands, 15,000 acres of cantonment, and 26,000 acres of impact areas.

COMPREHENSIVE ECONOMIC DEVELOPMENT STRATEGIES

In 2014, Fort Campbell supported over 247,180 persons including 29,486 Soldiers, 53,116 family members, 3,746 civilian employees, 52 reservist, 65,757 military retirees, and 91,436 retiree family members. The total FY 2014 post payroll was \$3.5 Billion.

Fort Campbell serves as a projection platform and premier training and development center for Air Assault Operations in the United States Army. The post is the home of the army's most deployed contingency forces.

Environment**Climate**

The climate of the Pennyriple Area Development District region consists of warm summers and relatively mild winters. The average temperature for the area is around 60 degrees Fahrenheit, with that temperature fluctuating according to the seasons. The normal amount of precipitation averages about 48 inches per year. The mean snowfall is 11 inches, although that number has been decreasing over the past few years. It precipitates an average of 55 days per year in the Pennyriple area. The prevailing winds for the region are Southern winds. The Pennyriple has an average relative humidity level of: 79 percent at 12 midnight; 84 percent at 6am; 57 percent at 12 noon; and 61 percent at 6pm.

**Air Quality**

The Federal Clean Air Act of 1970, including amendments in 1990, has helped improve the quality of air in Kentucky. The Clean Air Act specifies controls for six pollutants: ozone, nitrogen oxide, carbon monoxide, sulfur dioxide, particulate, and lead. The Kentucky Division for Air Quality operates a network of 98 monitoring stations in 34 counties across Kentucky. The information gathered at these stations is used to track yearly average concentrations of air pollutants in Kentucky. From the data, trends can be recognized. There are numerous sources of air pollution in the Pennyriple Area Development District region. These sources include smokestacks, automobile exhaust, and area sources such as dust from roads. Pollution controls on industrial sources and automobiles have signaled a decline in the average air concentrations of pollutants. The quality of the air has improved since 1980; however, Christian County has obtained a non-attainment status for the 8-hour ozone levels required by the EPA. This non-attainment maintenance status could possibly affect future highway project and industrial growth in the county.

Historic Resources

The Pennyriple ADD region has many historic resources that are unique to the area. Six of the nine counties currently participate in Renaissance on Main, a state program that will allocate funds to restore historically meaningful parts of the counties. The Kentucky Dam Village State Resort Park is also located in this nine county region. Other

COMPREHENSIVE ECONOMIC DEVELOPMENT STRATEGIES

historic resources in this area include the John James Audubon State Park in Henderson and the Jefferson Davis Monument State Historic Site in Fairview. One of the most memorable events in United States' history took place in the PADD region, The Trail of Tears. The Trail of Tears Park, located in Hopkinsville, is another unique historic resource of the Pennyrile area.

Downtown Princeton, KY

Recreation and Greenspace

The PADD region has many parks and other forms of recreation for the general public. In most of the nine counties, a City/County Park can be found for recreational purposes. Another well-known recreational area in the Pennyrile region is The Land Between the Lakes (LBL). This is a popular site for camping, fishing, or just spending time outdoors. Other areas of interest include the following: the Pennyrile Forest State Resort Park, Lake Barkley State Resort Park, and Kenlake State Resort Park.

Inland Waterway System

The Pennyrile region is centered in the middle of the eastern US Inland Waterway System. Waterways provide enormous advantages as a mode of transport compared to rail and highway modes of transports. Barge transportation primarily ships bulk material at a fraction of the price of other shipping options. The Mississippi River alone carries 60% of U.S grain shipments, 22% of oil and gas shipments, and 20% of all coal shipments.

SECTION 3

S.W.O.T ANALYSIS

This chapter provides an outline of...

- Area Strengths
- Area Weakness
- Area Opportunities
- Area Threats

SWOT ANALYSIS

SWOT stands for strengths, weaknesses, opportunities, and threats. A SWOT Analysis is a method of assessing the current state of the region and identifying the potential that exists to take advantage of strengths and opportunities as well as mitigate weaknesses and threats.

The following is a brief overview of the Pennyryle region:

Strengths

- a. The region is centrally located to the Midwest, Southeast and Northeast portion of the United States, which provides an ability to quickly access most of the large US population centers east of the Rocky Mountains
- b. Centrally located in the hub of four (4) large rivers used for Barges to carry bulk material via the Inland Waterway System
- c. No shortage of water resources for manufacturing plants that need water as a major element of their production process
- d. Affordable and reliable electric resources for manufacturing plants that need electric as a major element of their production process
- e. Good access to major Interstates and rail systems
- f. Affordable cost of living

Weaknesses

- a. Relatively small knowledge industrial base
- b. Insufficient risk capital to fund new start-up businesses
- c. Regional businesses not taking advantage of global markets
- d. Need better Broadband internet access in rural areas

Opportunities

- a. Growing local entrepreneurs by developing business start-up support networks and programs
- b. Promote value-added business that uses local agricultural products to produce new products
- c. Expanding regional business into the global markets

Threats

- a. A full and extended deployment of Ft. Campbell soldiers during another war or conflict would have a major negative impact on several sectors of the regional economy from retail sales to housing
- b. Military downsizing and Base closings could possibly affect Ft. Campbell
- c. A national economic downturn would have ripple effects into this region as well as across the United States
- d. Additional State or Federal regulations that restrict the operation and viability of coal fire power plants, which would further reduce the employment in the Western Kentucky coal fields
- e. Climate change on local agricultural production over the next 50+ years

SECTION 4

STRATEGIC DIRECTION

This chapter provides an outline of...

- Vision Statement
- Economic Priorities
- Goals, Objectives and Tasks

STRATEGIC DIRECTION

Pennyrile ADD Vision Statement

Plan for a diverse economy that provides family supporting jobs in a positive environment for business creation.

State of Kentucky's Economic Priorities

The following outline is a list of the current priorities for the Commonwealth of Kentucky:

Goals for Kentucky

- 1. Building Careers and Opportunities**
 - 1.1. *Increase Kentucky's competitiveness*
 - 1.2. *Enhance competitiveness of Kentucky's businesses*
 - 1.3. *Develop a 21st Century infrastructure*
 - 1.4. *Transportation systems that create economic opportunity*
 - 1.5. *Responsible management of Kentucky's natural resources*
 - 1.6. *Increase global presence*
- 2. A Healthier Kentucky**
 - 2.1. *Promote healthy lifestyles*
 - 2.2. *Promote quality, affordable healthcare*
 - 2.3. *Develop a 21st Century healthcare industry*
- 3. Educational Excellence**
 - 3.1. *Strengthen early foundation for success*
 - 3.2. *Maximize student achievement and college readiness*
 - 3.3. *Implement new strategies for high-quality teaching*
 - 3.4. *Align the educational system to ensure lifelong success*
 - 3.5. *Improve decision making through computer technology*
 - 3.6. *Focus the mission of statewide universities*
 - 3.7. *Provide stewardship from comprehensive universities*
- 4. Safe & Secure Communities**
 - 4.1. *Stem the proliferation of illegal drug use*
 - 4.2. *Protect Kentucky's most vulnerable citizens*
 - 4.3. *Reform corrections*
 - 4.4. *Ensure safe homes and communities*
- 5. Responsible Governance**
 - 5.1. *Establish a professional, efficient & effective management structure*
 - 5.2. *Foster a performance-oriented culture*
 - 5.3. *Enhance government through information efficiency*
 - 5.4. *Improve use of current resources*
 - 5.5. *Assessment of governance as a whole*

Strategic Direction

This strategic plan will guide the economic development efforts for the Pennyrile Region over the next five (5) years. This plan presents a shared regional vision, a set of goals, and some specific objectives and actions to accelerate the region's economic success. Ultimately, success of the recommendations in the plan will be dependent of the level of commitment from the various communities.

Goals

The following six (6) goals to support the vision statement and form the framework for the strategic plan.

Goal 1

Economic Development, Marketing and Sustainability:

Grow the Pennyrile Regional economy through economic development activities (business retention, expansion, and recruitment) and marketing efforts that enhance a region's image as a place to do business that supports long term economic resiliency and sustainability of the region.

Goal 2

Entrepreneurship and Innovation:

Leverage the higher education institutions in western Kentucky, major corporations, medical complexes, and innovations assets to establish the region's support for a base for entrepreneurship and small business growth.

Goal 3

Talent and Workforce Development

Build on the collaboration among the Pennyrile Region's higher education and workforce development organizations to create a strong pipeline of talent to support the region's current and future employers.

Goal 4

Transportation and Infrastructure

Capitalize on the region's existing transportation assets and modes (interstates, railroads, port, airports) and make strategic investment in regional infrastructure (including broadband) that improves the region's economic competitiveness and resiliency.

Goal 5

Place-Making, Smart Growth and Community Resiliency

Embark on local regional initiatives to strengthen the quality of place in the communities in the region to create an attractive environment for existing and future residents.

Goal 6

New and Affordable Housing Programs, Development and Affordable Child Care

These goals are not prioritized. Each of these goals is integral to the sustainability and growth of the region.

Strategic Goals, Objectives and Tasks

The following strategic goals, and accompanying objectives and tasks, are derived from the data and strategic planning process that has been identified in this document. It is important to recognize that many of the following objectives and tasks, as they are incorporated into the Pennyrile ADD's annual CEDS, will require financial resources not currently available to PADD. The CEDS Committee recognizes that implementing the Strategic Goals will require PADD staff and its local economic development agency partners to aggressively pursue additional and extensive funding sources and assistance to accomplish those goals.

Goal 1:

Economic Development, Marketing and Sustainability:

Grow the Pennyrile Regional economy through economic development activities (business retention, expansion, and recruitment) and marketing efforts that enhance a region's image as a place to do business that supports long term economic resiliency and sustainability of the region.

Objectives and Tasks

Objective 1 Increase the level of funding for economic development activities across the nine (9) county Region.

- (a) Explore ways to establish a pool of grant funds that economic development organizations within the region could apply for to advance economic development initiatives. This would not be a redistribution of existing funding for economic development organizations and programs in the region; instead, it would be aimed at increasing the overall resources for economic development initiatives in the nine (9) county region.
- (b) Catalog existing efforts that are not adequately funded, as well as new initiatives that should be funded.
- (c) Launch a formal fundraising campaign to build this pool of resources from the public sector, private sector, and foundations. Consider hiring a fundraising consultant to execute the campaign.

Objective 2 Market and promote the 9-county region as a great place to do business on the national stage

COMPREHENSIVE ECONOMIC DEVELOPMENT STRATEGIES

- (a) Expand existing marketing and business promotion efforts taking place in individual counties within the region to include references of the nine (9) county region as a whole including access to the intercostal waterways.
- (b) Identify and develop relationships with key decision makers (business executives, site consultants, and commercial real estate brokers) to promote the region as a place for business recruitment/expansion.
- (c) Market to the identified industry cluster audiences by utilizing specific media channels that serve those industries at national and international conferences and by directly contacting decision makers and thought leaders in those industries.
- (d) PADD should continue to work closely with the local economic development agencies within the region and state-level economic development officials to pursue new economic development opportunities for the region.

Objective 3 Enhance the regional economy through promotion of the natural and cultural resources for industry and tourism.

- (a) Work with the Visitors and Convention Bureaus, MDNR, MEDC and regional/local partners to establish unique natural or cultural resource brands for the region and establish the region as a four seasons travel experience.
- (b) Increase the opportunities for both visitors and residents to experience the natural and cultural resources within the region through diverse, adaptable and accessible outdoor recreation activities.
- (c) Support sustainable fisheries and wildlife-based industries that promote the region's world-class fishing and wildlife opportunities and provide sustained economic growth to the regional economy.

Objective 4 Engage a broad cross-section of organizations in the region's economic development & marketing efforts. Every organization in the region, whether non-profit, public, or private should be aware of the overall economic development strategies in the region and consider how they might contribute to their community's economic success.

- (a) Set up regular meetings between the region's economic development organizations, Small Business Development Centers and other groups to enhance shared awareness of economic development activities and to get on the same page with regional marketing efforts. In addition to the region's economic development

organizations, other groups that should be engaged include utility providers, railroad companies, community foundations, chambers of commerce and convention & visitors bureaus.

- (b) Encourage as much collaboration across the region as possible between organizations that have similar missions, including mergers or joint meetings, if appropriate.

Objective 5 **Expand international relationships & foreign investment in the region by establishing a formal effort to target and develop international business opportunities.**

- (a) Utilize the strength of the region's higher education institutions and workforce training efforts as a resource to build international relationships. Utilize and expand international programs and campuses that serve international students, as with Murray State University and Western Kentucky University
- (c) Leverage the existing concentration of international students at regional higher education institutions. Evaluate where students are coming from and establish a relationship with those regions. Build a database of international alumni and communicate with them regularly so they stay connected to the region after they return to their home country. Utilize international students as interns to assist in the development of these efforts.
- (d) Market and promote the services of the region's workforce training expertise in specific industry clusters to educational institutions in other countries
- (e) Assist large corporations in the region with the creation of a welcome program for international employees. This program could include receptions and networking opportunities for international employees, community information and marketing material in foreign languages, and other transitional resources and support.
- (f) Target businesses that have an international supply chain that utilize the I-69 corridor with Mexico or Canada to market the regions as a key national distribution location along Interstate 69.

Goal 2

Entrepreneurship and Innovation:

Leverage the higher education institutions in western Kentucky, major corporations, medical complexes, and innovation assets to establish the region’s support for a base for entrepreneurship and small business growth.

Objectives and Tasks

Objective 1 Create a regional entrepreneurship and start-up eco-system map indicating the various programs, initiatives, and assets that are in place to drive forward new business activity.

- (a) Create an online map to help entrepreneurs, start-ups and investors to navigate the region's existing entrepreneurship and innovation resources and network.
- (b) The eco-system map can serve as a tool to improve awareness of the region to outsiders sending the message that the PADD Region is a great place to launch a new enterprise or invest in a new venture.
- (c) The map can also be used to educate the local community about the spirit of entrepreneurship that exists and the start-up activity that is taking place. Because so many people within the region are unaware of existing entrepreneurship and innovation assets, the map can serve as a promotion piece to get the community thinking of itself as a hotbed for entrepreneurs.
- (d) Develop office and warehouse space for local startup entrepreneurs in each county.

Objective 2 Improve access to start-up capital for local entrepreneurs by fully utilizing existing investment sources within the region and developing stronger ties to angel and venture capital investors inside and outside the region

- (a) Identify regional and national venture capital and angel investors to help finance potential start-ups. Partner with local businesses (law firms, accounting firms, and other professional service businesses) to sponsor and fund startups with a small equity stake in the company in lieu of conventional payment or as a pro bono service to the community.

- (b) Work with the regional small business development centers to assist local entrepreneurs with tapping into federal funding sources by identifying Small Business Innovation Research (SBIR) grants and the Small Business Technology Transfer program (STIR), and other programs available to entrepreneurs.
- (c) Leverage the alumni networks at Murray, WKU, UK and U of L, as well as other colleges and universities to communicate with successful alumni who are entrepreneurs, looking to invest in, or return to the region.

Goal 3

Talent and Workforce Development

Build on the collaboration among the Pennyriple Region's higher education and workforce development organizations to create a strong pipeline of talent to support the region's current and future employers.

Objectives and Tasks

Objective 1 **Improve the workforce readiness of the region's K-12 students and adult population by better marketing the number of internships, apprenticeships, work co-op programs, and other initiatives.**

- (a) Provide better public outreach and information on the number of existing internships and work co-op programs for high school and college students to expose the region's young talent to employment opportunities in the region's businesses, government entities, and non-profit organizations.
- (b) Develop short-term and long-term training programs, early middle college and dual enrollment programs, apprenticeships, and work co-op programs for adult students, ensuring that these programs are designed to lead to employment opportunities.

Objective 2 **Conduct a talent analysis to quantify and document the region's labor talent so that economic developers may more successfully market the region and attract businesses and employers.**

- (a) Profile the current and potential labor force of the region by analyzing various resources and databases.
- (b) Profile the college graduates and certification program graduates of the region.

Objective 3 Encourage collaboration among the region's civic leadership programs to bring the region's young leaders together to discuss regional issues and challenges.

- (a) Tap into the Leadership Hopkinsville Program and the other similar Leadership programs in the other counties in the PADD region to coordinate issues, challenges and economic development programs.

Objective 4 Find ways to align veterans with regional employers.

- (a) Utilize the region's veterans as a pool of talent for employers, capitalizing on the tendency of veterans to prefer working alongside other veterans.
- (b) Work with Fort Campbell to tap the pool of military personal leaving service and wanting to remain in the area and transfer into the civilian workforce.
- (c) Identify Veteran Administration (VA) programs to help retrain and integrate veterans back into the workforce.

Goal 4
Transportation and Infrastructure

Capitalize on the region's existing transportation assets and modes (interstates, railroads, port, airports) and make strategic investment in regional infrastructure (including broadband) that improves the region's economic competitiveness and resiliency.

Objectives and Tasks

Objective 1 Continue to expand and improve broadband internet access throughout the region, especially in rural areas.

- (a) Focus on expanding broadband service in areas where it is not currently available (mostly in the region's rural areas).
- (b) Assist in mapping of tall structures to facilitate interest by broadband suppliers.
- (c) Support regional initiatives through educational workshops, convening of stakeholders and partnering with Connect Kentucky

to expand broadband infrastructure into the rural areas of the region through the Connect America Fund program.

Objective 2 Support efforts to maintain and improve the region's highways and local roadways.

- (a) Continue working with the region's Rural Transportation Committee (RTC), local governments, and district transportation planners to prioritize road improvements where they are needed most to improve the safety and connectivity of the region's roadway infrastructure for growth of existing businesses and the attraction of new companies
- (b) Work with the Kentucky Transportation Cabinet (KYTC), local Street Department supervisors and local engineers to modernize road and highway planning and infrastructure to effectively accommodate storm water runoff and infiltration needs, thereby reducing the costs and impacts of flooding.

Objective 3 Provide more comprehensive and more efficient transit services to support the region's workforce, employers, educational providers, veterans, older adults, people with disabilities and people with lower incomes.

- (a) Work with the region's higher education institutions, adult education providers, major employers, and other key constituents to identify ways to expand transit options to better serve the region's workforce. This may include extending public transportation into evening hours in some cases when it is deemed cost effective.
- (b) Work toward expansion and coordination of public transportation to serve key regional colleges (Murray State University, Western Kentucky University). Explore the possibility of PACS developing a shuttle service for all nine (9) counties to one of the major regional universities. This would involve one morning shuttle and one evening shuttle.
- (c) Work with regional stakeholders to identify regional gaps in mobility, particularly for veterans, older adults, people with disabilities and people with lower incomes.

Objective 4 Leverage and make strategic investments in the region's existing rail infrastructure to support the growth of key industries, particularly the agriculture sector.

- (a) Request a study be funded by KYTC to analyze all proposed rail related opportunities in the Pennyriple Region and prioritize rail-related investments based on the recommendations and input from local economic development staff in the region

Goal 5

Place-Making, Smart Growth and Community Resiliency

Embark on local regional initiatives to strengthen the quality of place in the communities in the region to create an attractive environment for existing and future residents.

Embark on local and regional initiatives to strengthen the quality of place in each of PADD's urban communities and reduce the vulnerabilities (economic, environmental and natural threats) to create an attractive environment for existing and future residents. Today's generation of young adults, much more than previous generations, favors urban living and everything that comes with it (riding transit, walking, biking, patronizing locally owned shops and restaurants instead of national chains, etc.). Providing an attractive environment which appeals to young professionals is critical for economic development because the number one issue for companies (and by extension, for communities) is access to qualified workers. And this is not limited to large cities. A growing amount of small cities and towns offer walkable neighborhoods and downtown districts that attract young people. Ultimately, the communities that can attract and retain skilled workers (whether they are large cities or small towns) have a major competitive advantage in today's economy.

The Region has struggled to retain and attract talented workers, especially young professionals, in recent decades. This struggle is not unique to the region—in fact, it's a national issue. However, the problem is often more challenging in small and mid-size metro areas that have fewer amenities than large metro areas. Nonetheless, the region is well positioned to emerge as a leading destination for talent. The region has a variety of attractive downtown districts in some of the region's smallest communities and largest cities, many of which are experiencing an uptick in investment and development from both public and private sectors. The region also has an abundance of natural and cultural resources to enable the population a multitude of outdoor recreational opportunities. And the region has many companies (large and small) that are committed to enhancing their communities as a way to retain and attract skilled workers.

A continuing struggle within the Region, and the State, is the result of the decade-long economic decline and the Great Recession that hit our communities like a hazardous storm. Those who were hit hardest are the households that are working, often at more than one job, and still struggling to survive. Economic vitality and resiliency strategies must take into account initiatives that assist this large component of our households in the region to shift from a survival mode to a sustainability mode.

Objectives and Tasks

Objective 1 **Expand and promote the region's recreation and entertainment opportunities as a way to retain and attract talent within the region.**

- (a) Explore ways to expand the region's recreational infrastructure (hike & bike trails, parks, ball fields, etc.) to expand the outdoor recreational opportunities for the residents. Identify potential funding sources for this.
- (b) Launch a regional entertainment promotional effort in partnership with the Lake Barkley Tourist Commission, local tourist boards and other local organizations to support the growth of existing festivals/events and to pursue additional events to attract visitors to the area.
- (c) Create a regional web site on regional entertainment that sends out emails once a week to everyone who signs up for the service. This will give everyone in the region advance notices of all events in the region.

Objective 2 **Establish place-making and good urban planning as a priority.**

- (a) All local communities need updated Comprehensive Plans, which are developed with a vision for each community that makes a noticeable impact on the look, feel and aesthetics of the community.
- (b) Coordinated and connecting bike and walking multi-use trails and sidewalks need to be a part of the Plan.
- (c) Planning Commission members need to be training on how to implement and develop planning studies.
- (d) Recreational opportunities and parks need to be a major elements of all local Comprehensive Plans.
- (e) Local Planning Commission members, Chamber leadership, economic develop agencies and local elected officials need to attend workshops where other communities had successful downtown revitalization efforts.
- (f) All local communities with blighted homes and other structures need to have funds in place in each year's budget to combat severely dilapidated structures.

- (g) Identify neighborhoods in need of revitalization and encourage collaboration with public private partnerships that target redevelopment programs in these neighborhoods.

Goal 6

Create Affordable Housing Programs, Provide Incentives for New Housing Developments and Affordable Child Care

Build on the existing affordable housing and childcare programs within the region and create incentives and partnerships with private developers to build new housing and affordable childcare opportunities in the region.

Objectives and Tasks

Objective 1 Make sure new and existing affordable housing programs in the region are well communicated to the general public.

- (a) Use various local and regional media sources, which includes social media and web site sources, to advertise new and existing affordable housing programs to the public. Have *First Time Homeowners* and affordable housing workshops in each county that also provide follow-up individuals counseling on affordable housing programs, as well as provide credit and other types of financial counseling.
- (b) Work with local real estate associations, banks, mortgage loan providers and local housing agencies on what programs are available and get input and recommendation on proposed new programs.

Objective 2 Establish an Ad-hoc Committee in each county to explore options for recruiting developers that specialize in constructing either new homes or new residential subdivisions.

- (a) Find out from the developers view point, what, if any, incentives could entice them to do a residential development in one of the PADD counties. Explore possibilities for public private partnerships. Have a few incentive concepts developed before these meetings to present to developers.

Objective 3 Develop incentives and programs to help open new affordable childcare facilities, as well as programs to offset the cost of childcare for low-to-moderate income families.

SECTION 5

ACTION PLAN IMPLEMENTATION

This chapter provides an outline of...

- Tenets of Economic Development
- Workforce Development
- KADIS
- Technology

ACTION PLAN IMPLEMENTATION

Tenets of Economic Development for the Pennyrile Region

The recent recession and continued job losses means that the U.S. economy is in a state of flux. When the economy emerges on its new trajectory, economic development will forever be changed. Traditional staples will shift, and new paradigms will rule the game:

1. **Traditional manufacturing will no longer sustain economies in the U.S.** *Manufacturing is not keeping pace and cannot be relied upon to serve as a region's largest job engine. Competition for new manufacturing jobs will be fierce and expensive (in terms of incentives). Economic developers must think differently about how they target this sector and must focus attention on retaining and helping their current manufacturing employers.*
2. **Smaller scale, highly targeted projects are the name of the game.** *Economic developers should focus attention on smaller, independently owned companies. As individual businesses, they may not be large job creators, but they are nimble and will attract additional investment into their communities.*
3. **Assist existing businesses with growth.** *Business retention activities should encompass much more than the traditional annual visit and a survey about their needs. Companies today need hands-on assistance. Economic developers should help connect local enterprises to suppliers and customers. Match them with affordable space to expand into rather than expecting them to build from scratch (communities are at high risk of losing companies if their only option is greenfield construction). Ensure that they have access to the same level of incentives as recruitment prospects do.*
4. **Build structural support for entrepreneurship.** *Business recruitment and local company expansion are two of three legs of a balanced economic development program. Entrepreneurship should be given equal attention. Communities that invest in support for local startups will be markedly more successful than communities that do not.*
5. **Keep wealth at home by providing primary employers a full spectrum of local professional services.** *Communities with an incomplete portfolio of professional service firms (e.g., accounting, marketing, legal, architecture, and engineering) lose millions of dollars each year that could be captured and circulating in the local economy. For these communities, growing professional service firms should be a focus of entrepreneurship initiatives.*

6. **Stay true to your roots.** Consider the traditional roots of a community's economy and identify innovative ways to help those businesses transition into the next generation. Innate strengths can serve as a theme behind a region's brand identity and platform for future target industries.
7. **Aim high and think differently.** Rocky economic conditions give communities an opportunity to reevaluate their economic development approaches and set new long-term goals. The sense of uncertainty often brings together entities that may not otherwise work together into a collaborative problem-solving mindset. It is an ideal time for "community ventures," a concept that this Strategy encourages for the Pennyriple region. For example, what will be the next great community venture to follow the successful Commonwealth Agri-Energy Ethanol Plant? The region should feel confident that it can do it again. Go for it!

Workforce Development

The West Kentucky Workforce Board (WKWB) serves the seventeen (17) western most counties of Kentucky through the implementation of the Workforce Innovation and Opportunity Act (WIOA) under the U.S. Department of Labor. The Board is composed of a majority of private sector/business representatives. The law envisions a strong role for local business-led boards under WIOA focusing on strategic planning, policy development and oversight of the local workforce investment system. By identifying local area workforce issues and concerns the WKWB brings together the necessary assets to facilitate solutions that foster prosperity for the region. All activities are performed in coordination with the chief elected officials – County Judge Executives and the Mayors of cities within the Western Kentucky Workforce Development Area.

Activities of the board include gathering and disseminating information about the area's labor market and businesses' employment needs; building a strong area-wide workforce development system; creating a local plan; convening brokering and leveraging resources of local stakeholders including businesses, training institutions, economic development and other community organizations to develop solutions to workforce development challenges; support and development of career pathways to high demand sectors; coordination with education and training providers, including adult education and literacy activities to ensure alignment with the local plan; and oversight of the local area's One-Stop Delivery System including procurement of operators, services, accessibility, performance negotiation and program oversight.

In addition to the business majority, the remaining membership of the WKWB is composed of labor organizations, adult education providers, educational entities, community organizations, economic development representatives, partner agencies, community and regional service agencies and training institutions. The Kentucky Education and Workforce Development Cabinet agencies, which are recognized as "Partners" under the One-Stop Career Center concept (Americas Job Center) collaborate with regional groups to provide services under the WKWB's guidance to serve the needs of customers and meet the needs of the workforce. Services are provided both to businesses and individuals, including adults, dislocated workers and

COMPREHENSIVE ECONOMIC DEVELOPMENT STRATEGIES

youth. Services assist the individual in attaining skills to be competitive in the workforce while creating a pipeline of talent for business.

Over \$5 million is invested each year in supporting high demand sectors, training and retraining workers for available jobs and business expansion as well as retention of a well-trained workforce in the region. Through On-the-Job Training (OJT) opportunities, businesses may be reimbursed up to 50% of the employee's salary during training, with Workforce funding offsetting the extraordinary costs associated with production time and quality during the training period. This program provides a significant incentive for employers to hire individuals who are unemployed, who are working in low-paying jobs, or who are working in low-skilled jobs. An average of twenty (20) businesses in the Pennyrile region participate in OJT programs with over 100 employees training and gaining full-time employment annually.

Additionally, the WKWB supports business and offers business services through its One-Stop Career Center system. Service centers located in Hopkinsville, Madisonville and Central City provide customized services to meet specific needs of business, regional sectors and area employers. These business services may include pre-screening services, assessments, referrals, job fairs, hiring events, retention services, soft skills training, apprenticeship support, on-the-job training and/or customized training. Special events are sponsored throughout the year to disseminate information to local employers about services available within the community.

Regional initiatives combining workforce and economic development strategies include:

- a. Assistance with local communities to develop partnerships, improve and support regional workforce initiatives, complete applications and attainment of Work Ready Community status through state and national initiatives as well as support for WRSI.
- b. Dislocation Support- In addition to support for the workers through Rapid Response, the WKWB offers Resource Roundtables for community solutions around major dislocations. This year as Coal Economy Dislocations and WARN Notices from Coal Companies continued to rise, so the WKWB met with economic development, local leadership, coal companies and community partners to look at solutions and employment sectors for retraining and employment opportunities. An Initiative (POWER) was started to address the impacts of coal and power industry reductions in Hopkins and Muhlenberg Counties and mitigate the impact of future reductions through emphasizing economic diversification in the region, through alignment and leveraging EDA and DOL funding.
- c. Leveraging regional resources and providing support and programs to build and support small business and grow entrepreneurship in the region
- d. Partnership with Ft. Campbell to assist in training and retraining transitioning military that allows workers to develop skills required to succeed in high growth/high demand industries;
- e. Facilitation of continuing funding opportunities for regional economic growth and strategic planning by aligning sectors with the West Kentucky Future and other regional studies and strategies as it relates to workforce development support, sector growth and providing solutions to workforce issues throughout the region

One of most recent communities to attain or improve their Work Ready Community Status

The WKWIB, headquartered in Hopkinsville, is assisted through the staffs of the Pennyriple Area Development District, Hopkinsville and the Purchase Area Development District, Mayfield. The Kentucky Education and Workforce Development Cabinet, Department of Workforce Investment administers and distributes the Department of Labor funds for Workforce Innovation and Opportunity Act programs to the local areas and assists with employment and training opportunities, technical assistance and monitoring of those funds within the Commonwealth of Kentucky.

Kentucky Agricultural Development Information Systems (KADIS)

The KADIS is a partnership between the Kentucky Department of Agriculture, the Governor's Office of Agriculture Policy, the US Economic Development Administration and the Kentucky Area Development Districts in an effort to link together all organizations, institutions, agencies, and individuals seeking to promote and develop the agricultural sector of the Kentucky economy. The ADD's work with each county in their respective region to gather data sets that will collectively produce an all-inclusive spatial/non-spatial Geographic Information System of all agricultural resources and assets throughout the Commonwealth of Kentucky. This web-based GIS driven system will create an emphasis on linkages and integration towards future planning and projects that affect the agriculture economy.

Some of the datasets included in KADIS include:

- a. Sites/buildings suitable for agricultural businesses and industry
- b. Soils data
- c. Existing ag businesses and facilities
- d. Disaster prone facilities, crop loss data, etc.
- e. Agricultural friendly land use regulations
- f. Kentucky Proud facilities, farmers markets, organic products, etc.
- g. Bio-energy resources/produce and local food resources
- h. Distribution/aggregation facilities
- i. Livestock resources

COMPREHENSIVE ECONOMIC DEVELOPMENT STRATEGIES

- j. Land uses including prime farmland, environmentally sensitive and protected areas, etc.
- k. Workforce development/technical training resources and programs
- l. Crop production information
- m. Transportation resources (rail, ports, etc.)
- n. Linkages to other resources such as water, sewer, etc.

Technology

Regional Innovation for Startups and Entrepreneurs (RISE)

Murray State University has established a regional *Western Kentucky RISE* hub to serve, attract and cultivate more entrepreneurs. This West Kentucky RISE program has partnered with the Technology Council of West Kentucky and other area entrepreneurship services providers to support early stage business development through capitalization, mentorship, navigating state and local regulations, as well as advice on scaling operations and other resources for high-growth potential businesses.

Innovation & Commercialization Center (ICC)

The Innovation & Commercialization Center (ICC) is part of a statewide network of offices dedicated to the development of startup Kentucky technology and high growth companies. The ICC utilizes a strict commercialization model to prepare startup companies for successful private equity and venture funding to ensure the development of a technology cluster in the region. The ICC is fully operational and serves thirty-four clients across the region who seek aggressive growth and the addition of dozens of technology jobs in the Western Kentucky region. The ICC is the home for several knowledge-based economic development programs. They include the Western Region Center for Emerging Technology (WRCET), a non-profit organization and the Technology Business Incubator (TBI).

The Technology Business Incubator (TBI) is a program designed to deliver services which accelerate the growth and development of technology business tenants in the RBIC building. The first resident client was placed in the RBIC building on May 1st, 2006. The tenant is a web-based software company in the streaming video management market.

Some of the advantages provided by TBI to business tenants are:

Services

- Access to University faculty / student expertise
- Assistance with identifying student employment opportunities
- Complete methodology (rigorous protocol) for commercialization
- Business plan guidance
- Financial Plan Consulting
- Access to Marketing Specialists
- Business Valuation (for angel and venture capital finance rounds)
- Introduction to private equity network (statewide)
- Access to other venture and startup consultants statewide
- Access to independent business technology consultants (on-site)

Facilities

- Office space with employee and visitor parking and campus security
- Premium commercial-grade High speed Internet access
- Video cable access
- Digital (VOIP) telephone system
- A staffed receptionist for phone and visitors management
- Conference room with networking and video equipment
- Mail room for incoming and outgoing (USPS, UPS, FedEx, DHL)
- Access to copy machine and fax machine.

Kentucky Opportunity Zones

Opportunity Zones target distressed areas where investors can receive significant federal tax breaks and deferrals for investing in a variety of economic development projects. Kentucky has 144 designated Opportunity Zone across the State, and there are five (5) in the Pennyriple ADD. These Opportunity Zoning are effective for 10 years and are intended to assist both existing businesses and new businesses.

SECTION 6

STRATEGIC PROJECTS

This chapter provides an outline of...

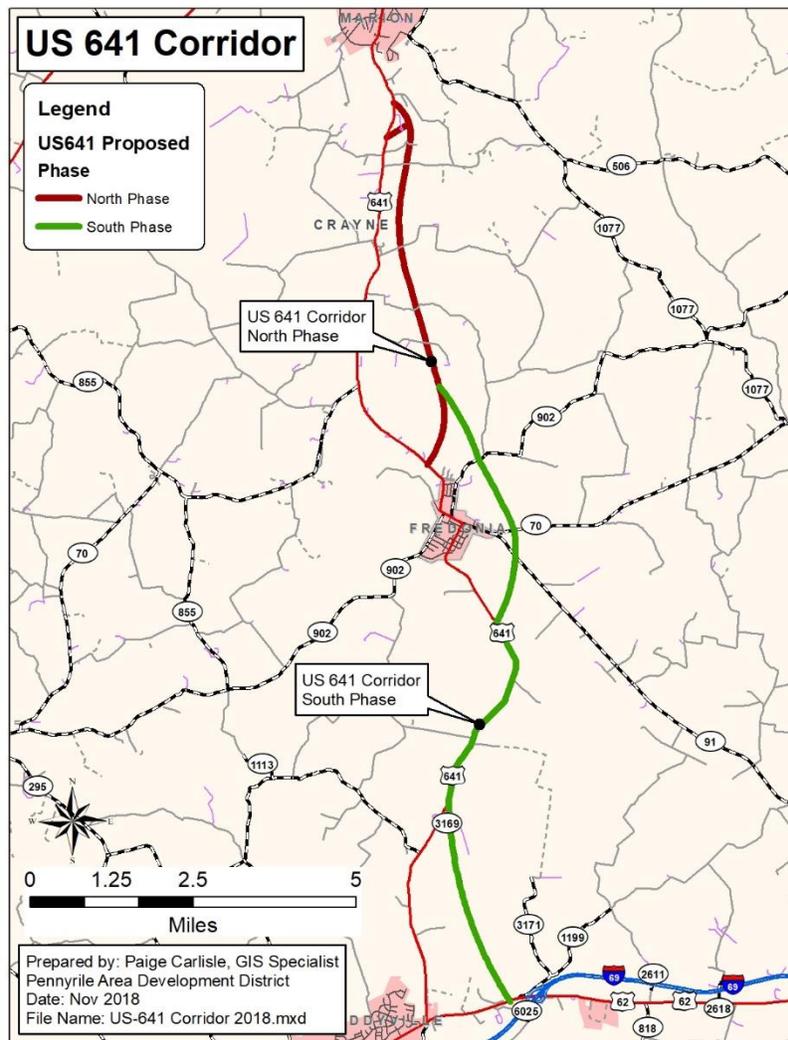

- Transportation
- Project List

STRATEGIC PROJECTS

Transportation

Complete the New US 641 route to Crittenden County

The proposed new/relocated US 641 highway, when completed, will provide Crittenden County with a direct link to I-69. The road will attract new investment into the City of Marion. This route is being developed in two (2) sections. The northern section of the new US 641 route has been completed but the southern section has not begun. The southern section of US 641 starts on US 62 just off the US 62/I-69 intersection and ties into the northern section just east of The City of Fredonia. The total project, including both sections, is estimated to cost \$109 million.

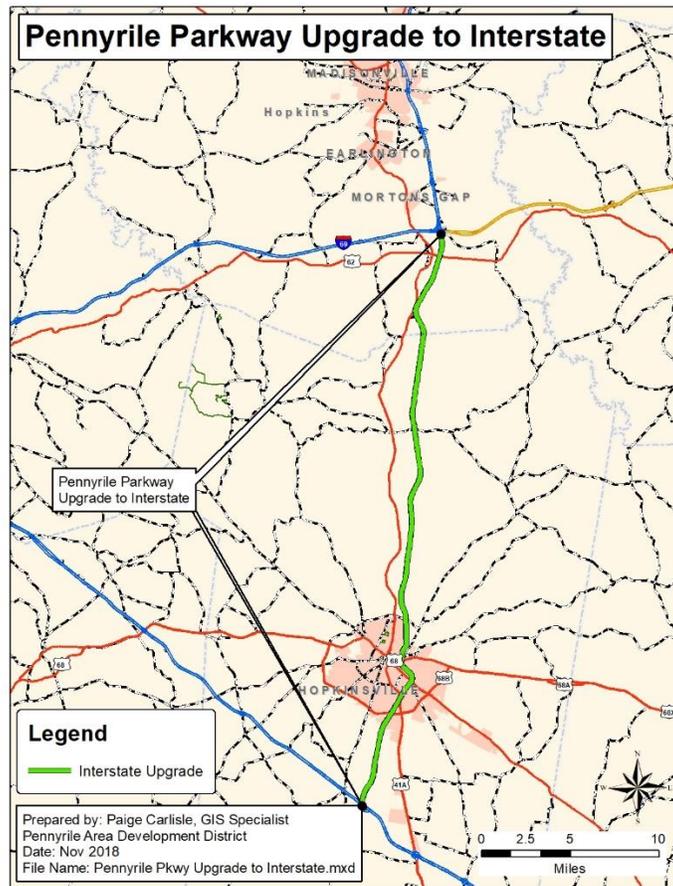

I-69 in Kentucky

There are two (2) remaining sections of the proposed I-69 corridor that still need funding. The section of the Julian Carroll Parkway that needs upgrading with spot improvements from just south of Mayfield, Kentucky to the Tennessee State line, and the Henderson Kentucky Bypass that includes a new bridge over the Ohio River. The proposed new I-69 Ohio River Bridge is not funded and with a cost of slightly over \$1 billion is the most challenging element to construct from a funding perspective.

The Upgrading of the Edward T. Breathitt “Pennyrile” Parkway to an Interstate from I-24 to I-69/WK Interchange.

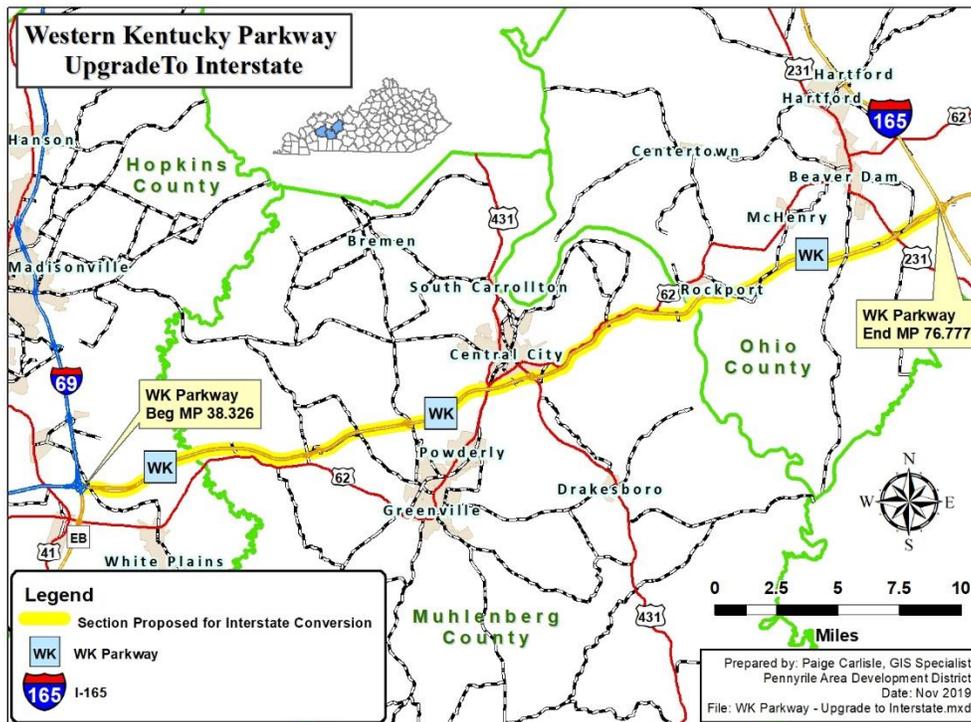

The Kentucky Transportation Cabinet (KYTC) initiated an interstate deficiencies study to identify and evaluate potential improvement options to upgrade the Edward T. Breathitt (formally the Pennyrile) Parkway to interstate standards for inclusion into the interstate system. This section of the Breathitt Parkway goes from I-24 in Christian County approximately 34 miles north to the intersection of I-69/Western Kentucky Parkway in Hopkins County. The Edward T. Breathitt Parkway (hereafter referred to as ETB Parkway), a fully controlled access facility. The proposed upgrades would provide interstate connectivity from I-69 in the north to I-24 in the south. A key part of the process to upgrade this route to interstate standards is an agreement must be reached between Commonwealth of Kentucky and the Federal Highway Administration (FHWA) concerning what improvements must be completed to a few sections of the Parkway system which does not meet interstate standards. This agreement must be reached before the Parkway can be upgraded and “shielded” as an interstate.

Twenty-seven miles of the ETB Parkway was constructed as a 70-miles-per-hour (MPH) rural, rolling terrain facility in the 1960s. The remaining southern seven (7) miles of the ETB Pennyrile Parkway from I-24 north into Hopkinsville was constructed in 2011 as a rural arterial. The Pennyrile Parkway needs additional safety improvement. These safety issues involve vertical and lateral bridge clearances, shoulder widths, interchange spacings, and other improvements. Currently, there are no commitments from KYTC to fund the needed safety improvements. Also, the Federal Highway Administration (FHWA) has not made any commitments to KYTC as to exactly which safety improvements must be fixed and which could obtain a waiver.

The Upgrading of the Western Kentucky Parkway to an Interstate from the I-69/WK Interchange in Hopkins County to the I-165 Interchange in Ohio County.

The Kentucky Transportation Cabinet (KYTC) initiated an interstate deficiencies study to identify and evaluate potential improvement options to upgrade the Western Kentucky Parkway to interstate standards for inclusion into the national interstate system. This section of the Breathitt Parkway goes from I-69 in Hopkins County approximately 38 miles east to the intersection of I-169 in Ohio County. The Western Kentucky Parkway is a fully controlled access facility, and the proposed upgrade would provide interstate connectivity to I-69 in the west to I-169 in the east. A key part of the process to upgrade this route to interstate standards is that an agreement must be reached between Commonwealth of Kentucky and the Federal Highway Administration (FHWA) concerning what improvements must be completed to key sections of the Parkway system which does not meet interstate standards before Parkways can be upgraded and “shielded” as an interstate.

**Other Strategic Projects in the
Pennyrile Area Development District**

Caldwell

Princeton/Caldwell County water and sewer improvements
Infrastructure improvements for business, industry and housing development
Enhance broadband availability in rural areas
Entrepreneurial infrastructure development
Outdoor/Recreational infrastructure development

Christian

Utility Improvements to Commerce Park II.
Road Infrastructure improvements to and in existing industrial parks
Hopkinsville Water Treatment Plant upgrade
Enhance broadband availability in Christian County through construction of fiber optic infrastructure
Infrastructure improvements for business, industry and housing development
Entrepreneurial infrastructure development
Outdoor/Recreational infrastructure development
Infrastructure improvements to support development in southern Christian County
Constructing the Christian County Industrial Connector and KY 115 widening project.

Crittenden

Infrastructure improvements to Industrial Park North
Infrastructure improvements for business, industry and housing development
Enhance broadband availability in rural areas
Entrepreneurial infrastructure development
Outdoor/Recreational infrastructure development

Hopkins

Infrastructure Improvements to new Hopkins County North Industrial Park Property along Pennyrile Parkway
Infrastructure development to serve as north/south connector road between Center St. and Island Ford Road on the west side of Pennyrile Parkway in Madisonville
Flood mitigation at Commercial Development (Martin Mall) in Madisonville
Rail Spur development for Madisonville Industrial Park
Entrepreneurial Infrastructure Development
Sewer infrastructure improvements between Madisonville and Hanson
Development of Regional Sports Complex
Infrastructure improvements for business, industry and housing development
Enhance broadband availability in rural areas
Outdoor/Recreational infrastructure development

Livingston

Infrastructure improvements to Industrial property along I-24
Development of River industry
Infrastructure improvements for the City of Smithland

COMPREHENSIVE ECONOMIC DEVELOPMENT STRATEGIES

Infrastructure improvements for business, industry and housing development
Enhance broadband availability in rural areas
Entrepreneurial infrastructure development
Outdoor/Recreational infrastructure development

Lyon

Eddyville Riverport Rail Spur and other infrastructure improvements
Develop a Riverport Mater Plan.
Eddyville/Kuttawa/Lyon County Water and Sewer Improvements
Infrastructure Improvements to support Fishing/Tourism related Industry
Infrastructure improvements for business, industry and housing development
Enhance broadband availability in rural areas
Entrepreneurial infrastructure development
Outdoor/Recreational infrastructure development

Muhlenberg

Infrastructure improvements for Industrial Parks
Greenville/Central City/Drakesboro Sewer Improvements
Develop Riverports along the Green River
Construct Rail Spur for Associated Pallet and Northern Central City Industrial Park
Entrepreneurial Infrastructure Development
Infrastructure improvements for business, industry and housing development
Enhance broadband availability in rural areas
Outdoor/Recreational infrastructure development

Todd

Guthrie Gas System Improvements/Expansion
Elkton Infrastructure Development along US 68-80
Infrastructure/utility improvements to industrial site along US 79
Infrastructure improvements for business, industry and housing development
Enhance broadband availability in rural areas
Entrepreneurial infrastructure development
Outdoor/Recreational infrastructure development
Upgrade US 79 from TN Line to Russelville
Rail spur for industrial development in southern Todd County
Infrastructure improvements to Elkton Water and Waste Water systems
Infrastructure improvements to Guthrie Water and Waste Water systems

Trigg

Water/Sewer improvements including I-24 area
Infrastructure improvements to Industrial Park #3
Water/Sewer improvements on east side of I-24
Enhance broadband availability in Trigg County through construction of fiber optic infrastructure
Infrastructure improvements for business, industry and housing development
Enhance broadband availability in rural areas
Entrepreneurial infrastructure development
Outdoor/Recreational infrastructure development

Pennyrile Region

Enhancing the region’s educational and workforce development resources, and to align training with target industry needs

Creation of a region-wide entrepreneurship initiative that puts into place networks and assets that will foster the creation of new homegrown companies

Improving the region’s business climate for its target industries and for business in general

Develop and promote initiatives supporting value-added agriculture related businesses

Construct adequate broadband infrastructure for all nine (9) counties

SECTION 7

ECONOMIC RESILIENCE

This chapter provides an outline of...

- Overview
- Possible Disruptions
- Strategies

ECONOMIC RESILIENCE**Overview of Economic Resilience**

It is becoming increasingly apparent that regional economic prosperity is linked to an area's ability to prevent, withstand, and quickly recover from major disruptions to its economic base. In the context of economic development, economic resilience becomes inclusive of three (3) primary attributes: the ability to recover quickly from a shock, the ability to withstand a shock, and the ability to avoid a shock altogether. Establishing economic resilience in a local or regional economy requires the ability to anticipate risk, evaluate how that risk can impact key economic assets, and build a responsive capacity. Often, the shocks/disruptions to the economic base of an area or region are manifested in three (3) ways:

- ❖ Downturns or other significant events in the national or international economy which impact demand for locally produced goods and consumer spending:
- ❖ Downturns in particular industries and constitute a critical component of the region's economic activity; and/or
- ❖ Other external shocks (a natural or man-made disaster, closure of a military base, exit of a major employer, the impacts of climate change, etc.)

Possible Disruptions in the Pennyrile Region

There are several possible major disruptions to the economic base of the Pennyrile region that should be planned for and mitigated to the extent possible. The Pennyrile region is fortunate that it does not have hurricane or forest fire problems, but like most regions we do have some possible shocks that could hit our region.

Ft Campbell base closure or extended deployment

The Base Realignment and Closure (BRAC) program is a process to increase the Department of Defense efficiency by planning military base realignments and closure of military installations. More than 350 installations have been closed in five BRAC rounds: 1988, 1991, 1993, 1995, and 2005. One of the largest economic threats to our region is the closing of Ft. Campbell or a major reduction of troops via realignment. Although, this does not seem likely due to the fact that the Base houses the 101st Airborne Division (Air Assault) that provides our Nation an unmatched expeditionary Air Assault capability for land operations around the world, as well as other quick reaction units on Base.

However, the same qualities that make Ft. Campbell critical to the military, also makes it likely to deploy during a major operation of land forces. This has happened two (2) times in the last 15 years with the Gulf War (1990), and the Afghanistan and Iraq War (2001 to present). The first Gulf War was a major blow to the economy of the region. The majority of Ft. Campbell Forces were deployed for an extended period. Retail stores, restaurants, housing and a host of other businesses were significantly hurt and some went out of business. By the time the Afghanistan and Iraq War began in 2001, the region was more prepared for large scale deployments, and Ft. Campbell began deploying smaller units like brigades to rotate troops into the conflict which meant that some troops

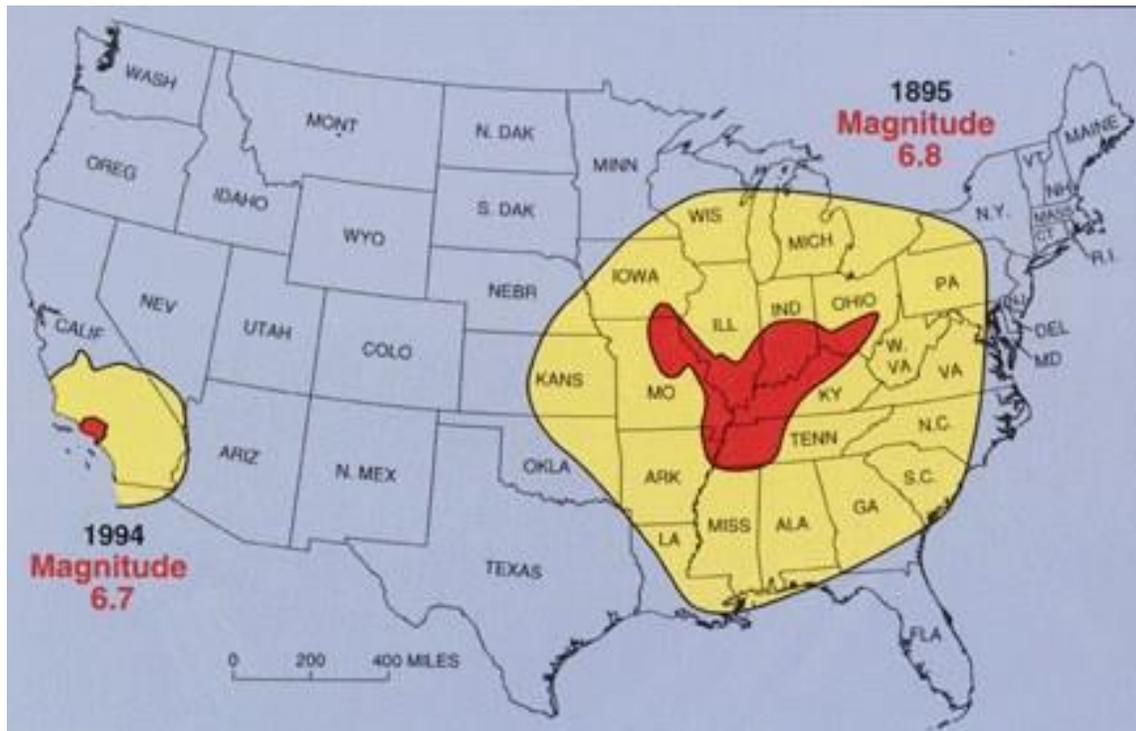

remained at Ft. Campbell and were rotated in and out of the conflict which helped reduce the impact on local businesses.

The region can mitigate Ft. Campbell troop deployments by diversifying the base economy to areas that do not rely on the military base, the local business owners that do rely on the base need to make investing decisions based on the fact that deployments can occur and when the President of the United States needs to call 911, someone at Ft. Campbell is likely to answer the phone.

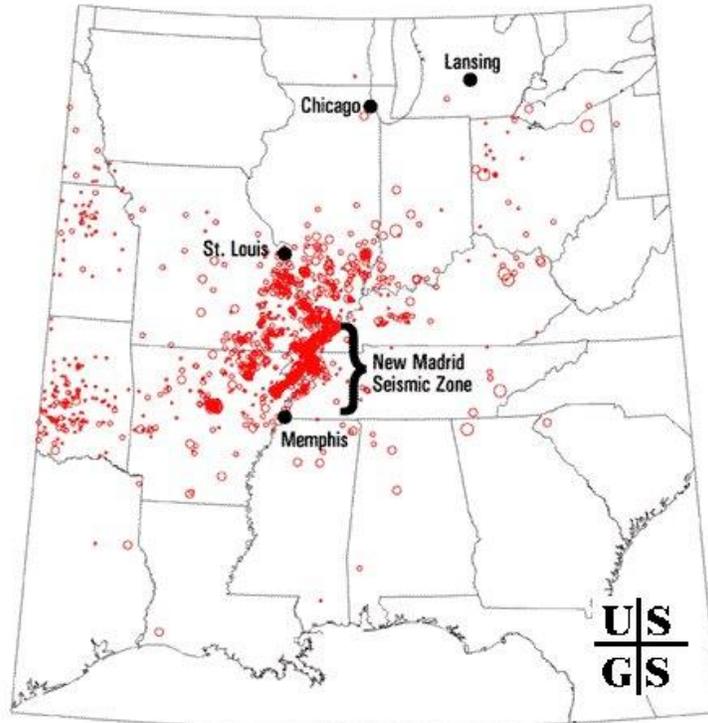

New Madrid Earthquakes

The 1811–1812 earthquakes were a series of intense earthquakes beginning with an initial pair of very large earthquakes on December 16, 1811. They remain the most powerful earthquakes to hit the contiguous United States east of the Rocky Mountains in recorded history. They, as well as the seismic zone of their occurrence, were named for the Mississippi River town of New Madrid, then part of the Louisiana Territory, now within Missouri.

There are estimates that the earthquakes were felt strongly over roughly 50,000 square miles, and moderately across nearly 1 million square miles. The 1906 San Francisco earthquake, by comparison, was felt moderately over roughly 6,200 square miles.

The New Madrid seismic zone still remains active. There have been over 4,000 earthquakes along the zone since 1974.

4000 earthquakes have been reported since 1974

The region can mitigate earthquake impacts on the economy by developing and enforcing local building codes that have earthquake standards. KYTC and other state agencies already require bridge and other transportation infrastructure to be capable of handling a major earthquake. Our local and regional emergency response agencies need back-up generators and other equipment to allow them to operate without electrical power, as well as planning for earthquake events.

Floods

Flooding is always a major concern in the Pennyryle Region. Floods can knock out bridges, and inundate commercial building and homes. The Ohio River flood of 1937 took place in late January and February 1937. With damage stretching from Pittsburgh to Cairo, Illinois, one million people were left homeless, with 385 dead and property losses reaching \$500 million (\$8 billion in 2012 dollars). At Paducah, the Ohio River rose above its 50-foot (15 m) flood stage on January 21, cresting at 60.8 feet (18.5 m) on February 2 and receding again to 50 feet (15 m) on February 15. For nearly three weeks, 27,000 residents were forced to flee to stay with friends and relatives in higher ground in McCracken County or in other counties. Some shelters were provided by the American Red Cross and local churches. Buildings in downtown Paducah bear historic plaques that note the high-water marks. With 18 inches (460 mm) of rainfall in 16 days, along with

sheets of swiftly moving ice, the '37 flood was the worst natural disaster in Paducah's history. Because Paducah's earthen levee was ineffective against this flood, the United States Army Corps of Engineers was commissioned to build the flood wall that now protects the city.

Flash flooding can also occur on all of the Pennyriple smaller rivers and major streams. The region can mitigate flood impacts on the economy by developing and enforcing local zoning and building codes can prevent commercial and residential construction in Flood Plains. Preventing urban development in Flood zones is the easiest solution, but "Buy-Out" programs that offer to purchase homes in flood zones, and then teardown the homes is another program.

Strategies for Economic Resiliency

The CEDS Committee addressed the issue of economic resiliency by asking and discussing the question "If you knew that the major economic drivers and job creators in your committee were to disappear in 5 years, what would your community be doing now to diversify the local economy and create economic resiliency"? That "lead in question" to the economic diversity discussion refocused the CEDS Committee on the Strategic Goals resulting in adding additional objectives and tasks to those goals. It was recognized that some of the Strategic goals were intended to enhance the current economic engines in the community, some were focused more on the economic resiliency of new business attraction and development, and some were a combination of both. The CEDS Committee concluded that the Strategic Goals that should be emphasized as ways and means to encourage and develop economic resiliency are as follows:

Strategic Goal 1

Improve the Economic Development Climate and Economic Development Capability of the Pennyriple ADD Region.

Establish regular meetings of an effective, collaborative network of economic professionals throughout the PADD Region to address current and shifting economic needs of the respective communities and the Region generally. Part of the charge and responsibility of this Economic Development Advisory Council (EDAC) must be to effectively monitor and address the changing needs of the regional and local economy and develop current "real time" strategies to address the needs of economic adaptation and diversification. The EDAC can also be an effective body to network and collaborate with other local, state and national economic development organizations as indicated in the other Strategic Goals.

Strategic Goal 2

Maximize the Potential of the Tourism Rich PADD Region.

While tourism is already embedded as a viable economic engine in the Region, the natural and historic resources that create the tourist environment will remain regardless of potential economic changes in the area. Expanding tourism opportunities and activities in the Region, increased and enhanced advertising and marketing of the tourism assets of the Region, and effectively developing regional and inter-local

collaboration to attract visitors can serve as an important and viable resource to withstand possible downturns in other areas of the Region's economy.

Strategic Goal 3

Strengthen, Expand and Diversify the Existing Economic Base within the PADD Region.

This Strategic Goal, by definition, is focused on the issue of developing economic diversity in the PADD Region. It is intended to immediately address the need for economic diversity and resiliency.

Strategic Goal 4

Leverage Transportation Planning for Economic Base Improvement

Expanding the transportation network and insuring that the Pennyrile Region's transportation issues and needs are adequately addressed. Alternate highway routes that can accommodate truck traffic are essential to the economic resiliency of the PADD Region.

Strategic Goal 5

Target the global economy by helping local business diversify their market outside the US when feasible.

Local economic development staff should go to training courses developed by the National Chamber of Commerce or other groups to help local business navigate international shipping, exchange rates, contracts, etc

Strategic Goal 6

Develop Strategies for Business Resiliency in Disaster Situations

Develop and implement a training program for businesses to anticipate and mitigate disaster situations. Fortunately, the PADD Region is located in an area that has a relatively low risk of natural disasters. The most common natural disasters arise from winds and flooding. Even then, the disasters are primarily small scale and localized to a small geographic area. Even though the prospect of natural disasters is low, the CEDS Committee determined that the most effective way to address the issues of business resiliency in the event of a natural or other disaster situation was to develop a training curriculum to educate businesses in the Region in two (2) major areas:

1. How to prepare for a disaster that may create business problems, or closure.
2. Ways to maintain a business in the event of a disaster.

SECTION 8

EVALUATION FRAMEWORK

This chapter provides an
outline of...

- Evaluation Procedures

EVALUATION FRAMEWORK

EVALUATION PROCEDURES

The Pennyrile Area Development District will annually review and update the area's Plan. To accomplish this task, the PADD will establish standards for plan review that will identify annual changes in the socio-economic climate of the District. Secondly, the PADD will determine weaknesses or obstacles that are hindering economic growth and stability.

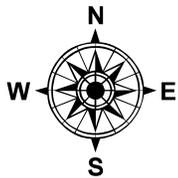

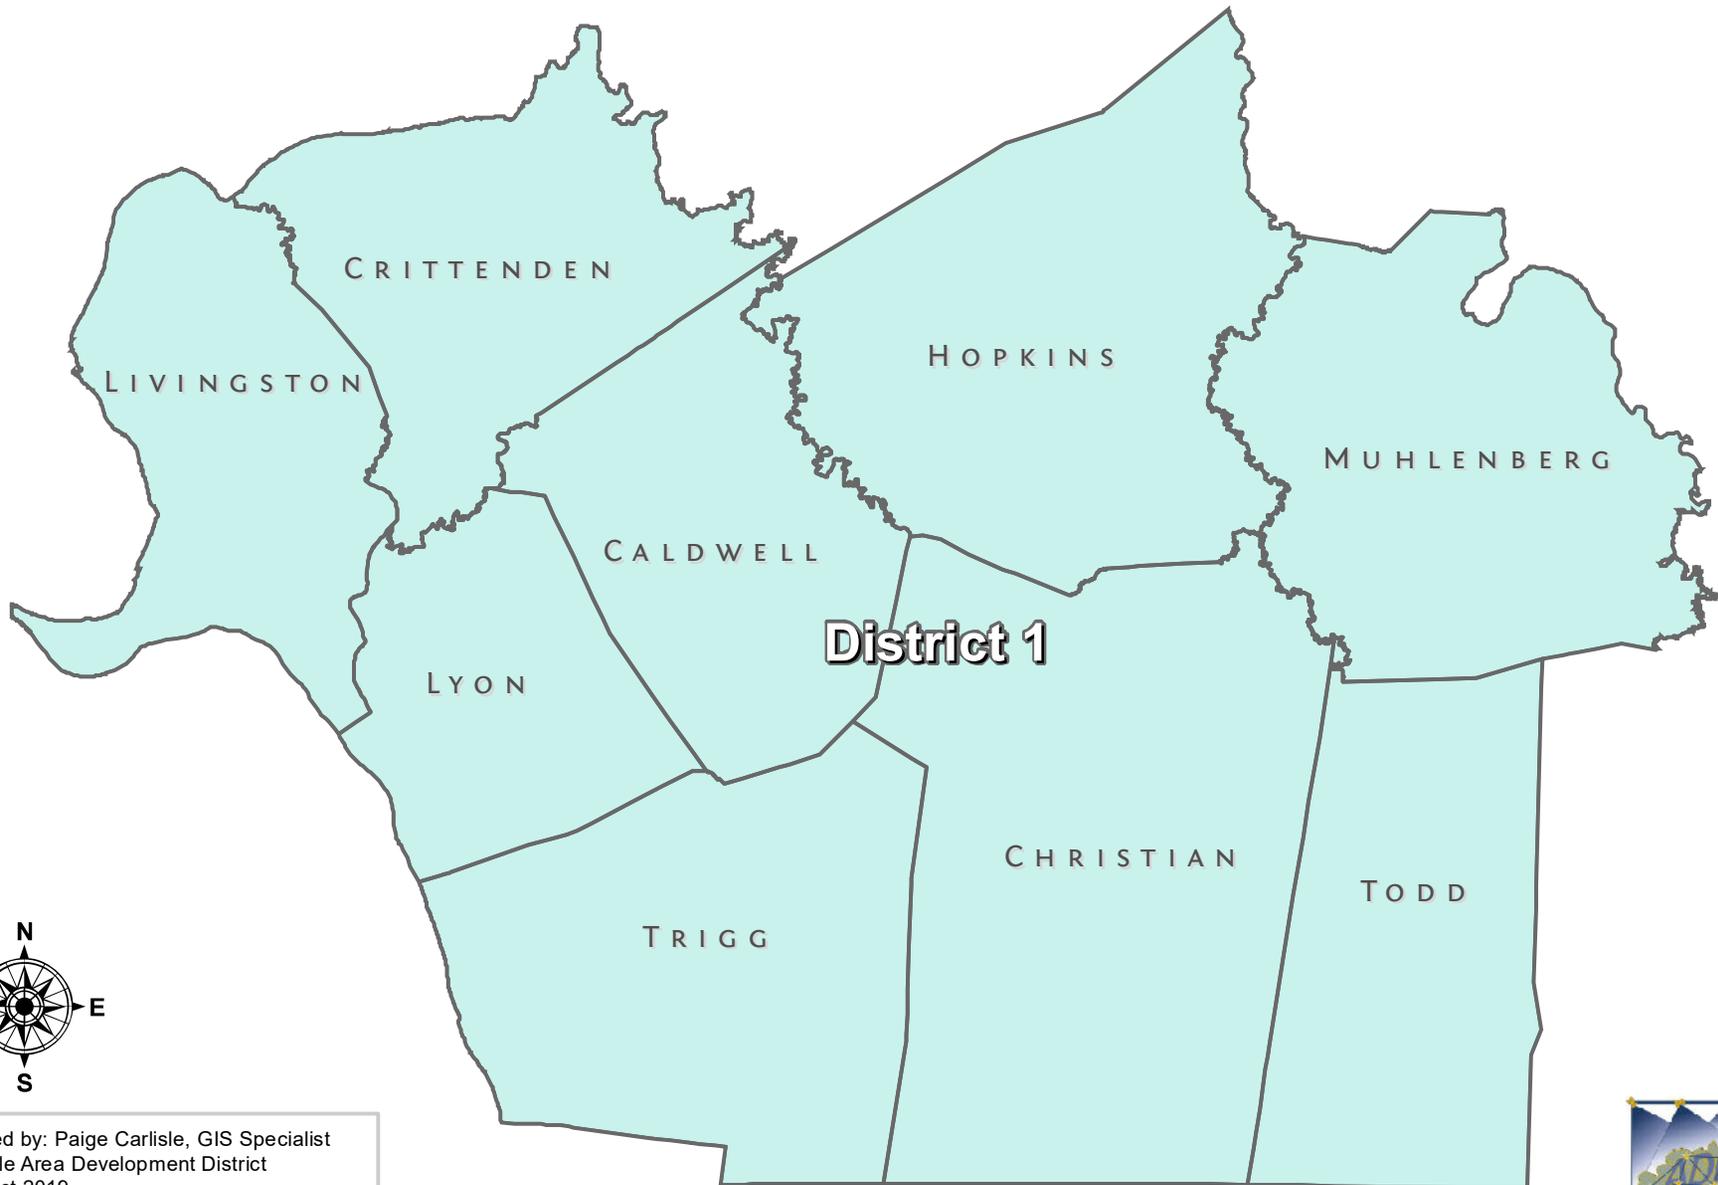

An Advisory Committee will be formed to conduct a series of meetings with committees assigned to deal with the economy; human resources; infrastructure; transportation; natural resources; and justice. The Committee, with PADD's assistance, will evaluate information received in the categorical program committee meetings to establish an agenda for public meetings.

Residents from across the Pennyrile will be invited to participate in public forum meetings to set goals and objectives for future plans and programs. These meetings will be conducted on an annual basis and the information obtained will become a part of the 2020 CEDS.

APPENDIX B

CEDS Resolution

2020 Comprehensive Economic Development Strategy Update

Resolution 2020-03

WHEREAS, the Pennyrile Area Development District is one of fifteen Area Development Districts within the Commonwealth of Kentucky; and

WHEREAS, the Kentucky Area Development Districts, in coordination with the Kentucky Department for Local Government and the Economic Development Administration, previously engaged in a Commonwealth-wide community-based, strategic planning process known as **Comprehensive Economic Development Strategy (C.E.D.S.)**; and

WHEREAS, the CEDS is a continuous process enabling Kentuckians to strategically plan for themselves through consensus management of all resources; and

WHEREAS, the CEDS has been updated in accordance with standards set by the Economic Development Administration; and

WHEREAS, the Board of Directors recognizes this plan as the Pennyrile Area Development District's consensus for future growth and revitalization in the region.

NOW, THEREFORE, BE IT RESOLVED, that the Pennyrile Area Development District Board of Directors approve and adopt the Pennyrile Area Development District 2019 Update of the Comprehensive Economic Development Strategy document and will provide copies to the Economic Development Administration.

Adopted this 9th day of November 2020

Chairman
