

### ***Small Group Guidelines:***

1. *Please keep your sharing focused on your own thoughts and feelings. Limit your sharing to 3 to 5 minutes.*
2. *No cross talk please. Cross talk is when two individuals engage in conversation, excluding all others. Each person is free to express his or her feelings without interruptions.*
3. *We are here to support one another, not 'fix' one another.*
4. *Anonymity and confidentiality are basic requirements. What is shared in the group stays in the group. The only exception is when someone threatens to injure themselves or others.*
5. *Offensive language has no place in a Christ-centered recovery group.*

## Relapse Signs and Warnings

Experiencing Post-Acute Withdrawal: **I start** having problems with one or more of the following; thinking difficulties, emotional overreaction problems, sleep disturbances, memory difficulties, becoming accident prone, and/or starting to experience a serious sensitivity to stress.

**Return to Denial:** **I** stop telling others what I'm thinking/feeling and start trying to convince myself or others that everything is all right, when in fact it is not.

**Avoidance & Defensive Behavior:** **I** start avoiding people who will give me honest feedback and/or I start becoming irritable and angry with them.

**Starting to Crisis Build:** **I** start to notice that ordinary everyday problems become overwhelming and no matter how hard **I** try, **I** can't solve my problems.

**Feeling Immobilized (Stuck):** **I** start believing that there is nowhere to turn and no way to solve my problems. **I** feel trapped and start to use magical thinking.

**Becoming Depressed:** **I** start feeling down-in-the-dumps and have very low energy. **I** may even become so depressed that **I** start thinking of suicide.

**Compulsive and/ or Impulsive Behaviors (Loss of Control):** **I** start using one or more of the following- food, sex, caffeine, nicotine, work, gambling, etc. often in an out of control fashion. And/or **I** may react without thinking of the consequences of my behavior on myself and others.

### **Urges & Cravings (Thinking About Binging/ Drinking/**

**Using):** **I** begin to think that food/sex/alcohol/drug use is the only way to feel better. **I** start thinking about justifications to use and convince myself that using is the logical thing to do.

**Loss of Control (Drinking/ Using):** **I** find myself acting out &/or using again to solve my problems. **I** start to believe that "it's all over 'till **I** hit bottom, so **I** may as well enjoy this relapse while it's good." My problems continue to get worse.

## 10 MOST COMMON RELAPSE DANGERS

1. Being in the presence of triggers such as casinos, drugs or alcohol, others who use, or places where you used. Taking your phone into private places.
2. Feelings we perceive as negative: anger; sadness, loneliness, guilt, fear, and anxiety.
3. Positive feelings that make you want to celebrate.
4. Boredom.
5. Associating with people who are currently using.
6. Physical pain.
7. Listening to war stories (the good old bad days) and dwelling on using.
8. Suddenly having a lot of cash.
9. Using prescription drugs that get you high even if you use them properly.
10. Becoming complacent. Believing you no longer crave or are triggered by food/porn/gambling/drugs/alcohol et. and that it's safe to use occasionally.
