“Drilling, “Fracking”, Earthquakes & our Energy Bills,” by Lake George geologist John Rakowski. John will discuss the advantages of horizontal drilling and the evolution of “fracking” from post-Civil War times to the present. He will also delve into the advantages of fracking as well as the downsides. We’ll learn about increased earthquake activity in the Mid-Continent region and why. We’ll also discuss how horizontal drilling & fracking impact our energy bills.
