

PAPAKAIO SCHOOL

202 Health Curriculum Consultation Procedure

The School's Health Curriculum needs to be re-considered every two years. This will be part of the review of the School's Curriculum Action Plan.

The Principal must consult with parents, guardians and the Board of Trustees when reconsidering the Health Curriculum.

THE CONSULTATION WILL TAKE PLACE IN THE FORM OF:

1. The publication of the School's current Health Curriculum in the school newsletter.
2. The publication of a Health Curriculum questionnaire sent to all parents, guardians, staff and Board of Trustee members. The questionnaire will invite comments and suggestions for changes to the school's goals for Health as outlined in the Curriculum Action Plan.

THE PRINCIPAL WILL THEN PREPARE A WRITTEN DESCRIPTION OF:

- the nature and results of the consultation
- the proposed future treatment of the various elements of the Health Curriculum
- the elements relating to sex education are to be included.

NOTE: No aspects of the National Health Curriculum can be excluded from instruction but stronger emphasis can be placed on certain parts of the Curriculum, eg Farm Safety for a farming community.
