UNITED STATES PATENT OFFICE.

SAMUEL CLARKE, OF CHILD'S HILL WORKS, COUNTY OF MIDDLESEX,
ENGLAND.

DESIGN FOR A CANDLE-LAMP.

SPECIFICATION forming part of Design No. 17,355, dated May 24, 1887

Application filed March 28, 1887. Serial No. 232,620. Term of patent 14 years.

To all whom it may concern:

Be it known that I, SAMUEL CLARKE, of Child's Hill Works, in the county of Middlesex, England, have invented a Design for Glass
5 Candle-Lamps, of which the following is a specification, reference being had to the accompanying drawing, representing a view in perspective of my design.

I provide a glass candle-lamp of symmetrical and pleasing natural form by giving to it
10 approximately the outline of a conventionalized acorn in its cup.

The cup A has an annular projection, *a*, around it, and supports the dome B. The dome
15 is reduced in its diameter at its upper portion gradually to its top opening, *b*, so that the appearance of the whole is symmetrical and much like an acorn in general contour.

The ornamental appearance of the cup is

increased, without impairing its likeness in
20 general appearance to an acorn-cup, by the annular flange C, projecting upwardly from the annular projection *a*, and the scallops *e f* of the projection and flange, respectively.

I claim—

25 The design for a candle-lamp of conventionalized acorn shape, consisting of the cup A, having an annular projection, *a*, and the dome B, gradually reduced in diameter at its upper portion, and having the top opening, substantially as described and shown.
30

In testimony whereof I have hereunto subscribed my name.

SAMUEL CLARKE.
